nestself

Consultations and webinars

Step-by-step guide. Each chapter follows one person through one task, screen by screen: joining a consultation, answering a follow-up, approving one, attending or running a webinar.

Epic NS-CALLS-01
Edition of 30 October 2026

For
Employees, experts, HR and approvers, NestSelf operations

Screens
Sample environment, fictional people

English edition. The product also ships in Serbian (Latin and Cyrillic) and Hungarian; every screen works the same in each language.

START

Before you start

Two web apps, four kinds of people.

Who uses which app

- **Employees** and **HR** use the workspace app.
- **Experts** and **NestSelf operations** use the admin app.
- Pick the tutorial for your task from the list below. Each one stands alone.

How to read a step

- Buttons and fields are in bold green, like **Join session**. Messages the app shows are in quotes, like “Five minutes left.”
- Each step shows the screen on a computer (left) and on a phone (right). Times are HH:MM and dates DATE where the app fills them in.
- The people are fictional sample people: Jovan Petrović (employee), Milica Ristić (expert), Ivana Jovanović (HR), Nikola Đorđević (operations). Video is a drawn placeholder.

Tutorials

01	Join your consultation	3
02	If the connection is weak or you are late	10
03	Answer a follow-up proposal	13
04	Run a consultation	17
05	Approve follow-ups	20
06	Attend a webinar	22
07	Create and publish a webinar	29
08	Run a webinar live	32
09	Book a consultation	35
10	Good to know	37

TUTORIAL 1

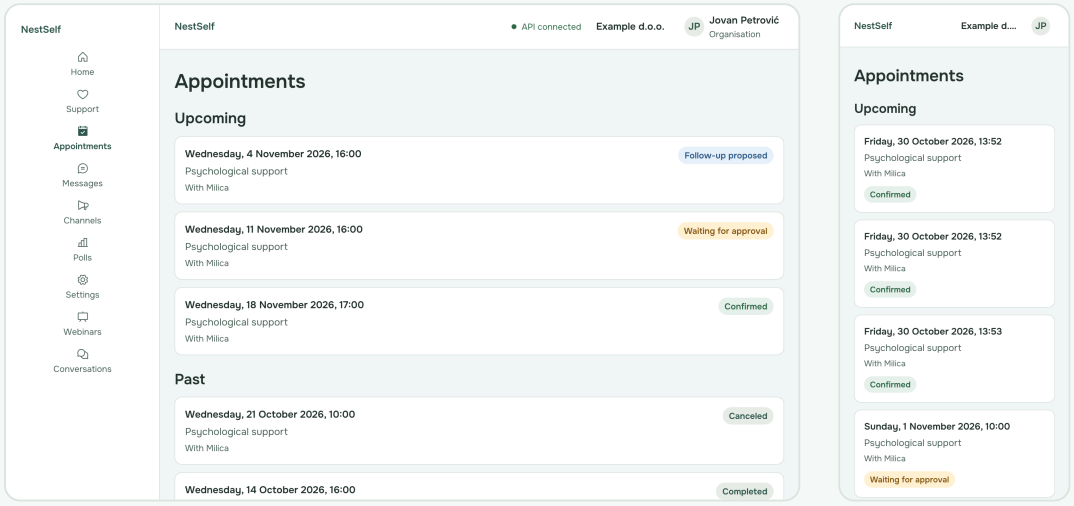

Join your consultation

Employee · workspace app

An employee meets a NestSelf expert in a private video session. Only the two of you are in the room, and nothing is recorded.

1 Open your appointments

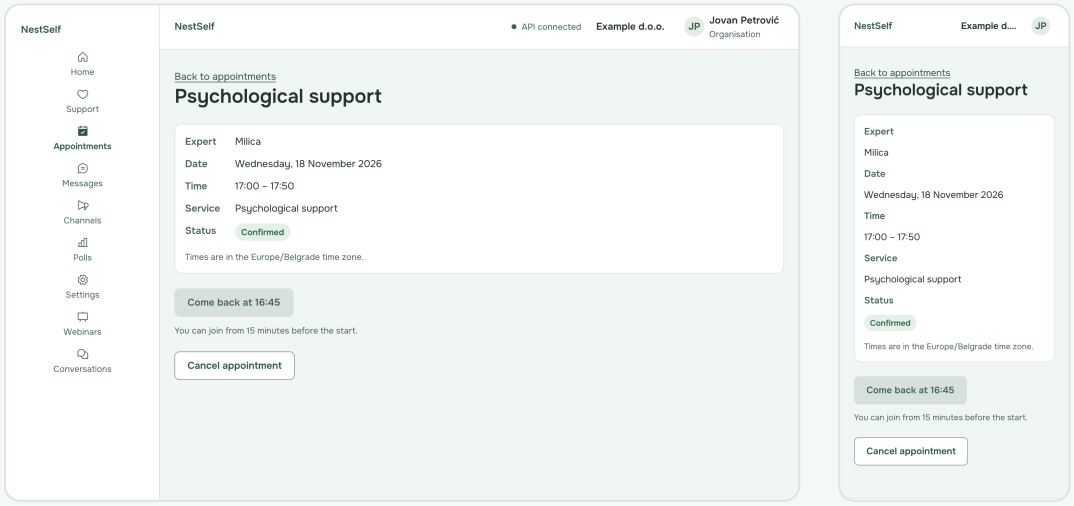

In the workspace app, open **Appointments**. **Upcoming** lists the sessions to come; each row shows the date, the service, your expert's first name and a status badge.

Screen 01 · computer and phone

2 Open the appointment

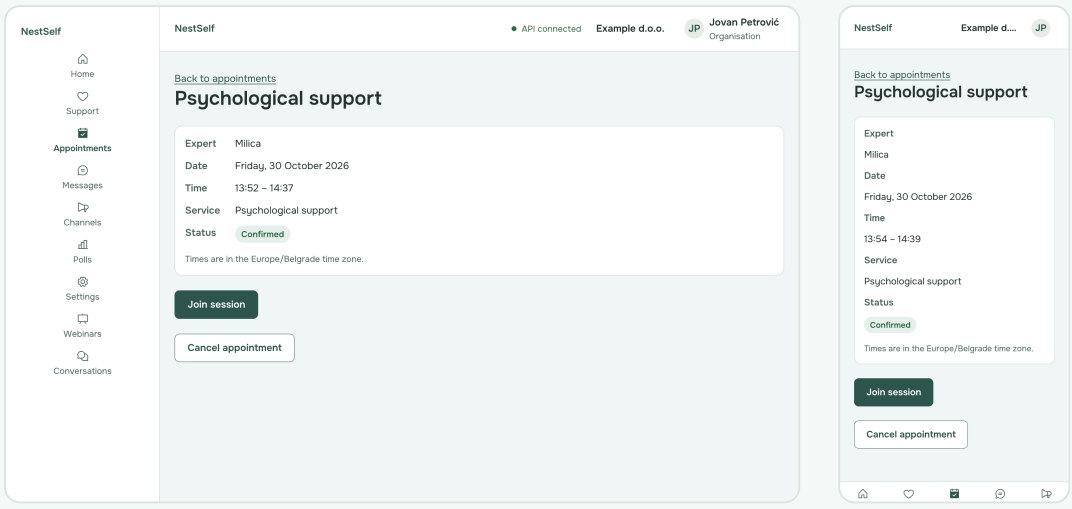

Until 15 minutes before the start the button reads **Come back at HH:MM** and cannot be selected. You can still **Cancel appointment** from here.

Screen 02 · computer and phone

3 Join from 15 minutes before

When the window opens, **Join session** becomes active. Select it.

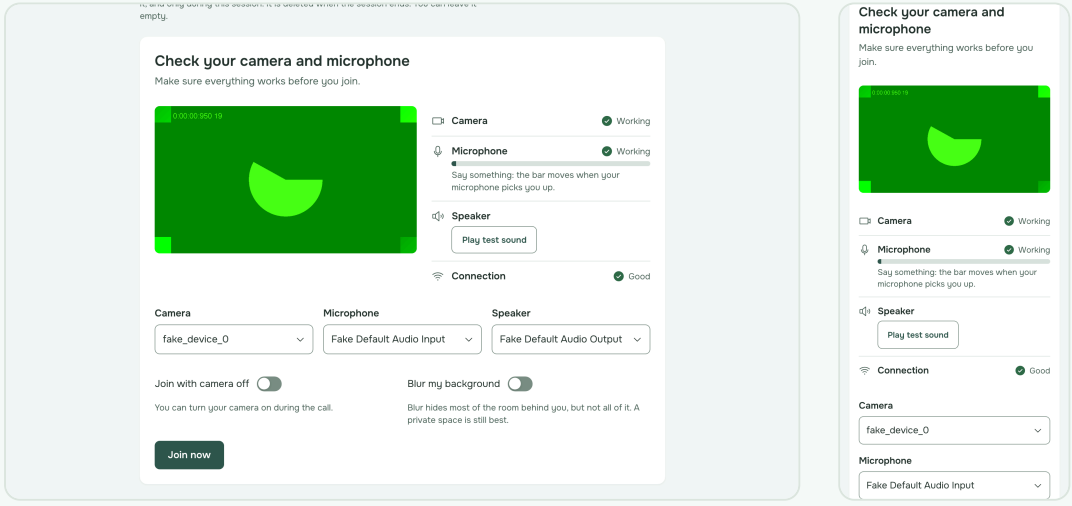

Screen 03 · computer and phone

> **The join window**
>
> Joining opens 15 minutes before the start. A first join is possible until 10 minutes after the start; once you have joined, you can rejoin until the room closes, 15 minutes after the scheduled end.

4 Check your devices

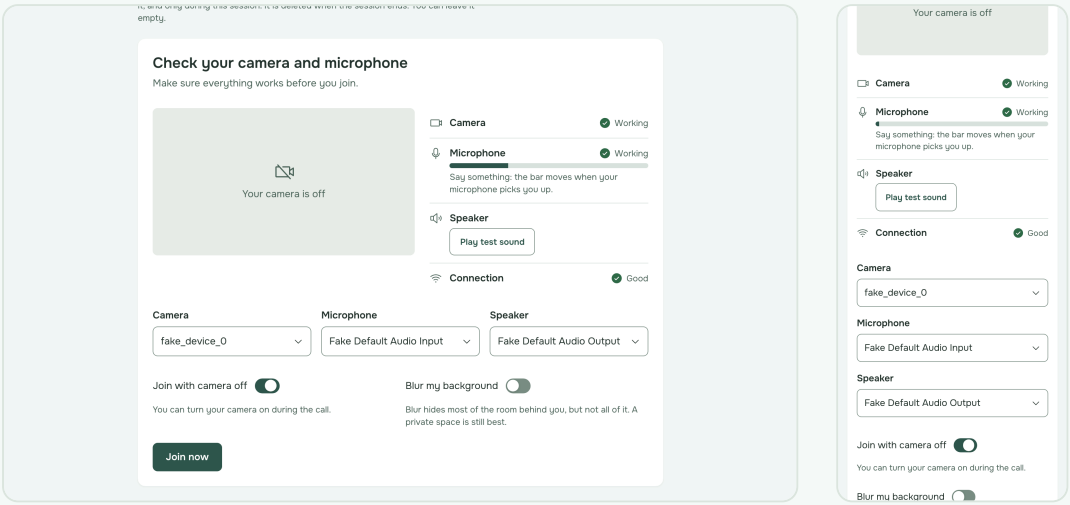

“Check your camera and microphone” tests your camera, microphone, speaker and connection. Speak and watch the bar move, select **Play test sound**, change a device if needed, then **Join now**. The microphone must work; the camera is optional.

Screen 04 · computer and phone

5 Optional: camera off or blurred background

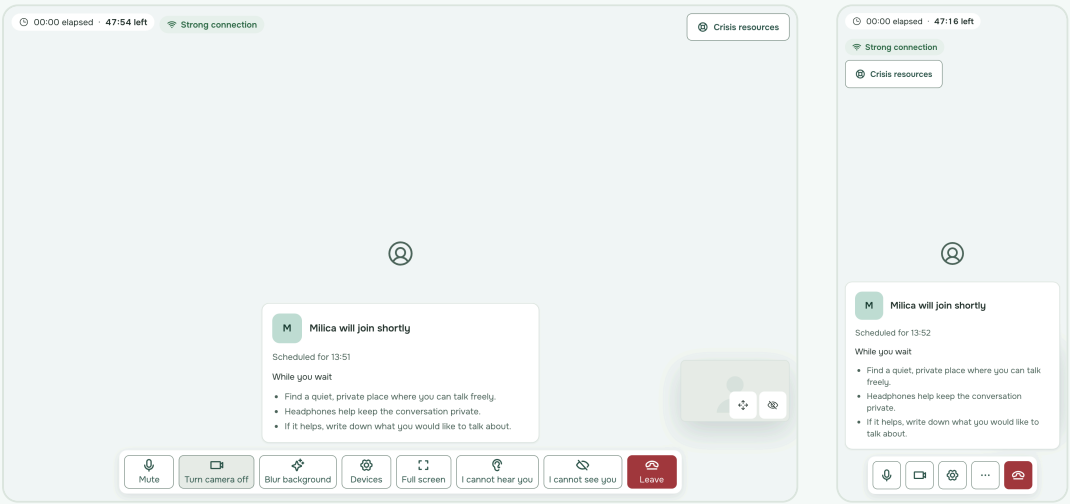

Switch on **Join with camera off** to join without video, or **Blur my background** to hide the room behind you. Both are remembered on this device.

Screen 05 · computer and phone

6 Wait for your expert

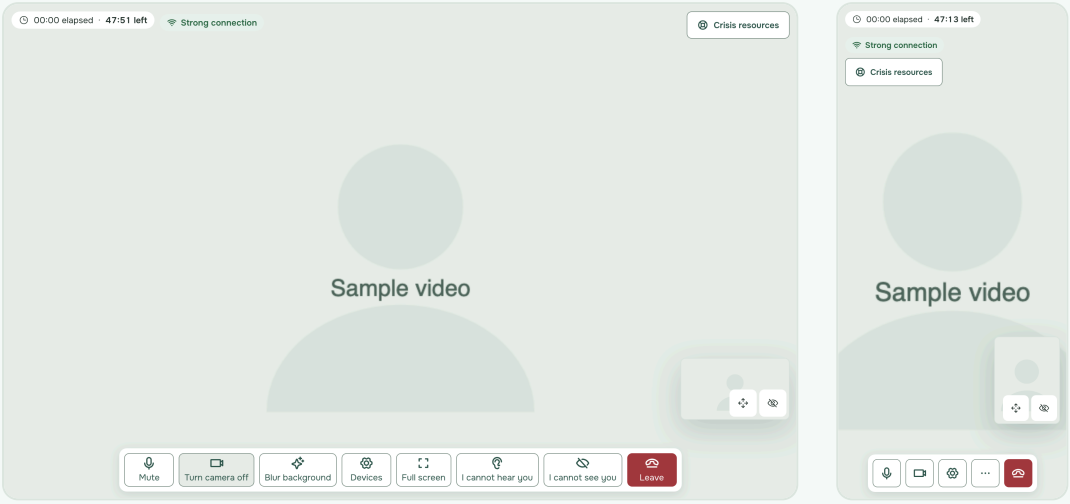

If you are first, the stage says “Your expert will join shortly” with the scheduled time and a few tips. If your expert is running late, the card tells you. The call starts when they join.

Screen 06 · computer and phone

7 Talk

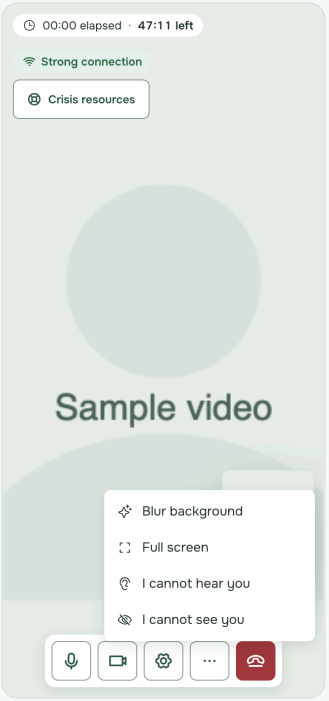

Your expert fills the screen; your own video sits in a corner. The bar has **Mute**, **Turn camera off**, **Blur background**, **Devices**, **Full screen**, the quick signals **I cannot hear you** and **I cannot see you**, and **Leave**. A consultation is never recorded.

Screen 07 · computer and phone

8 On a phone

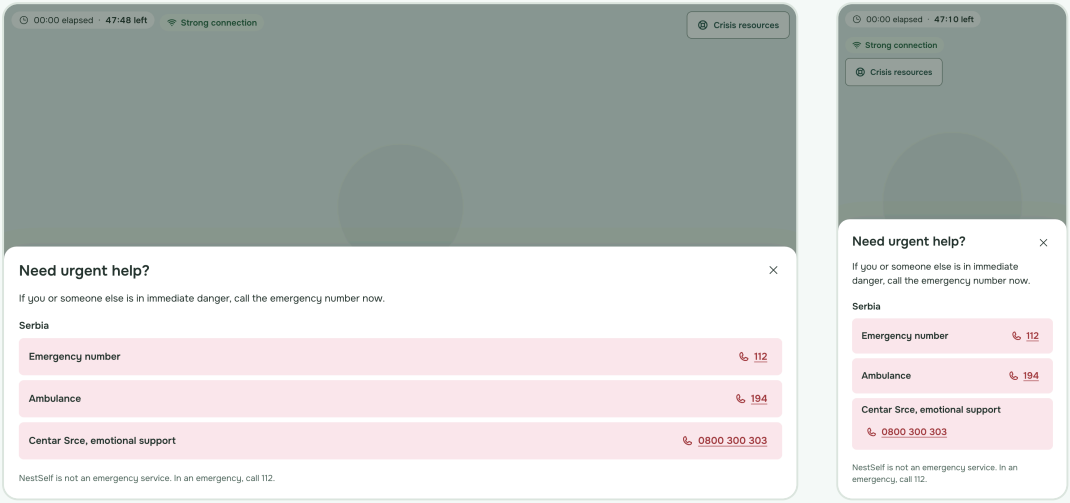

The main controls stay in the bar; **More** holds blur, full screen and the two quick signals.

Screen 08 · phone

9 Need help right now?

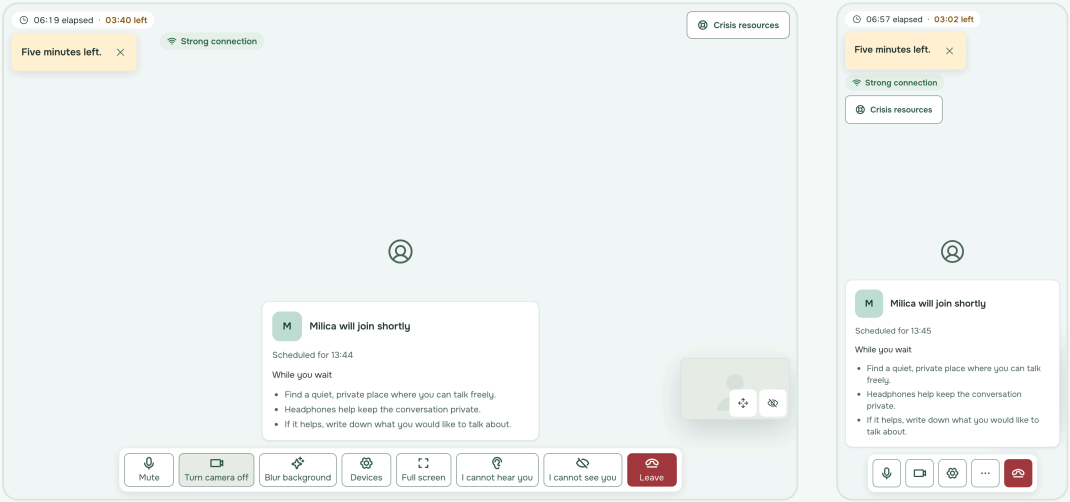

Crisis resources is always at the top. It opens the Serbian crisis numbers (112, 194, Centar Srce 0800 300 303) over the running call; on a phone, tap a number to call it. Close it with the cross.

Screen 12 · computer and phone

10 Five minutes left

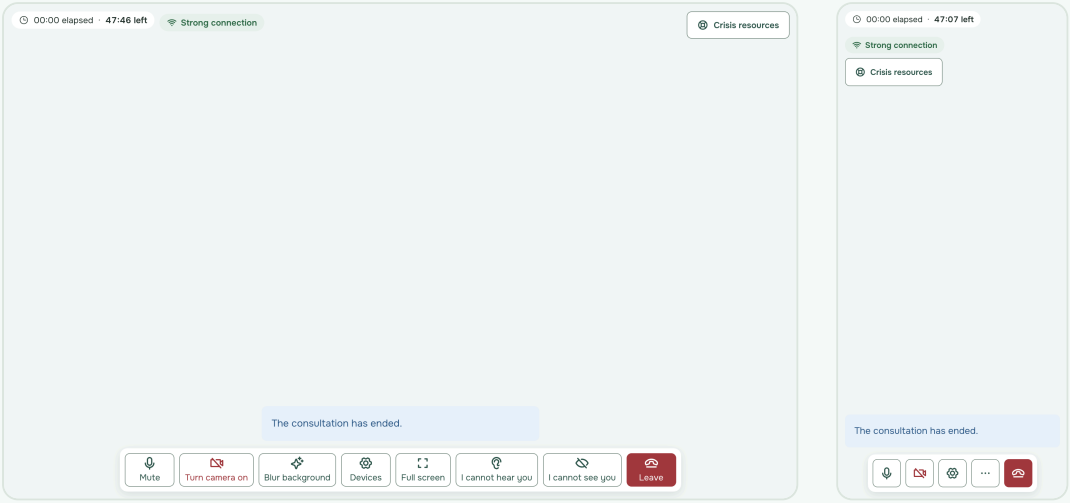

The timer shows the time elapsed and left. Five minutes before the end, “Five minutes left.” appears. The room closes 15 minutes after the scheduled end.

Screen 13 · computer and phone

11 The session ends

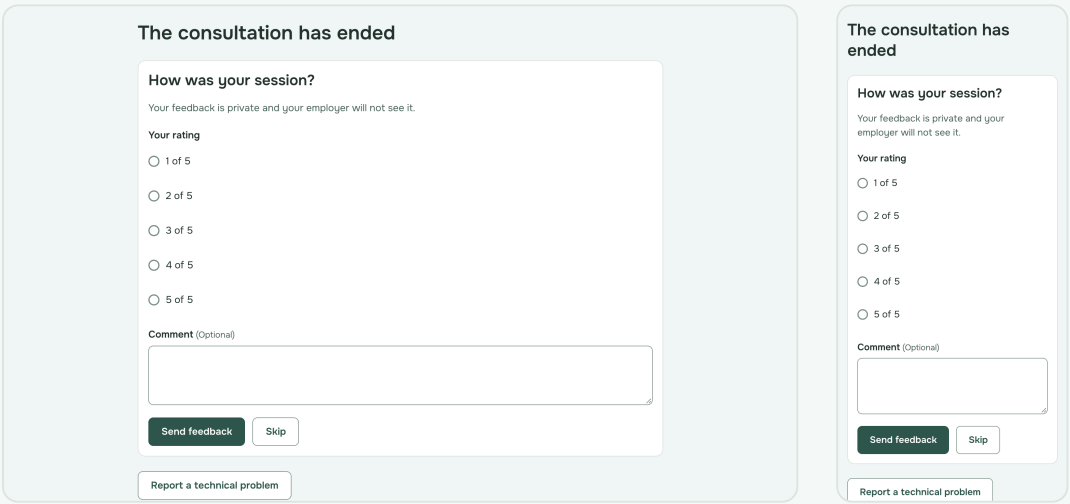

When your expert ends the session, the stage says “The consultation has ended.” for five seconds, then the post-call screen opens. **Leave** at any time leaves only you.

Screen 18 · computer and phone

12 Leave private feedback

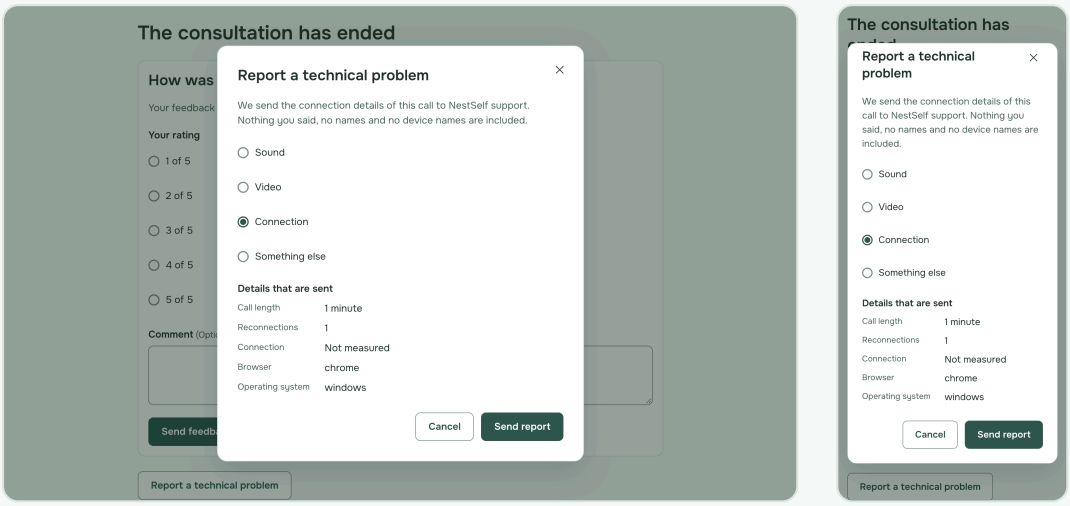

Rate the session from 1 to 5 and add a comment if you like, then **Send feedback**, or **Skip**. “Your feedback is private and your employer will not see it.”

Screen 19 · computer and phone

13 Report a technical problem

If something went wrong, **Report a technical problem**. Pick what failed; the dialog lists exactly what is sent (call length, reconnections, connection quality, browser, operating system) and nothing else. **Send report**.

Screen 20 · computer and phone

TUTORIAL 2

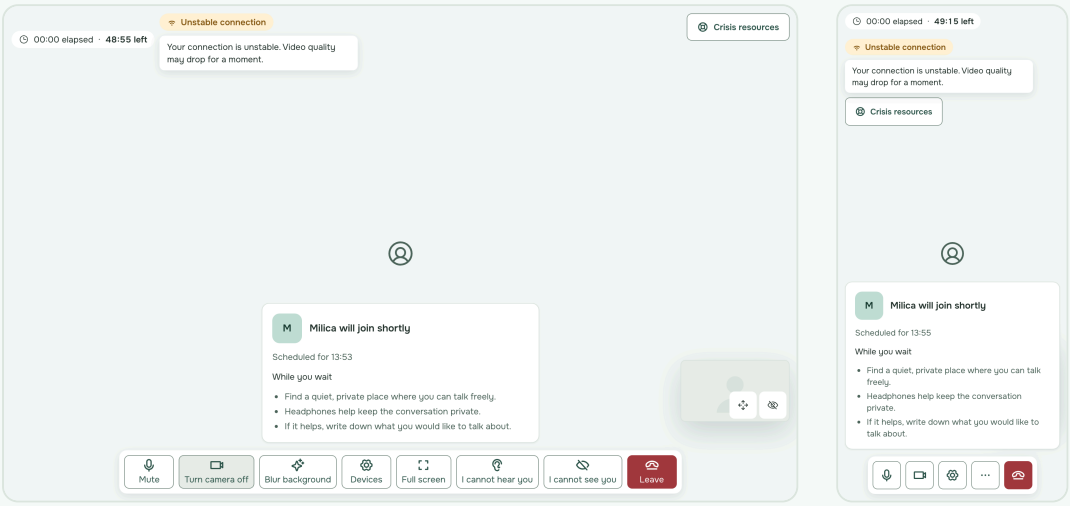

If the connection is weak or you are late

Employee · workspace app

What the app does on a bad connection, and what you see when the join window has closed.

1 A weak connection

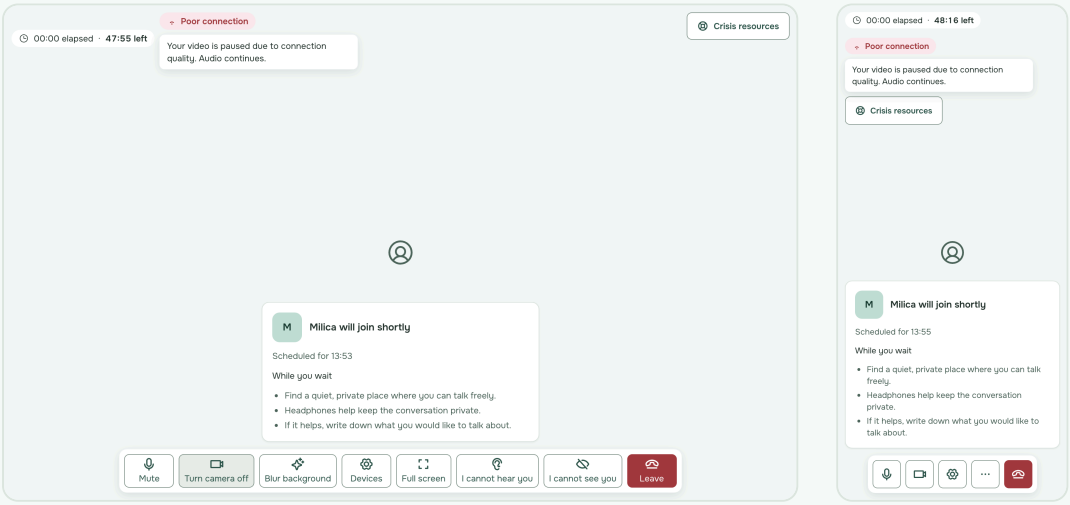

The badge turns yellow and a banner says “Your connection is unstable. Video quality may drop for a moment.” Keep talking; the app lowers your video quality first.

Screen 10 · computer and phone

2 Video paused, sound continues

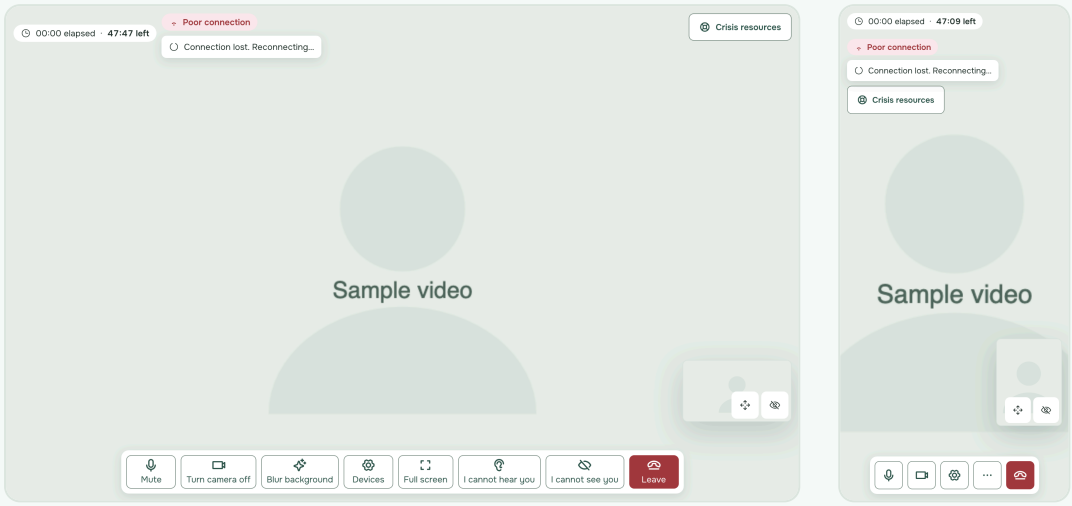

After two poor measurements your outgoing video pauses: “Your video is paused due to connection quality. Audio continues.” It comes back by itself when the connection recovers.

Screen 11 · computer and phone

3 Connection lost

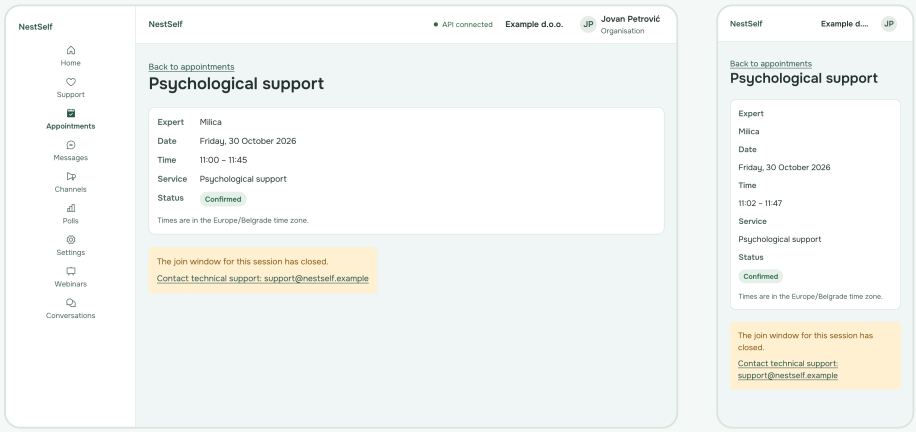

The app shows “Connection lost. Reconnecting…” and tries for up to two minutes. If that fails, choose **Rejoin** or **Contact support**. Rejoining puts you back into the same session while the room is open.

Screen 09 · computer and phone

4 You are too late

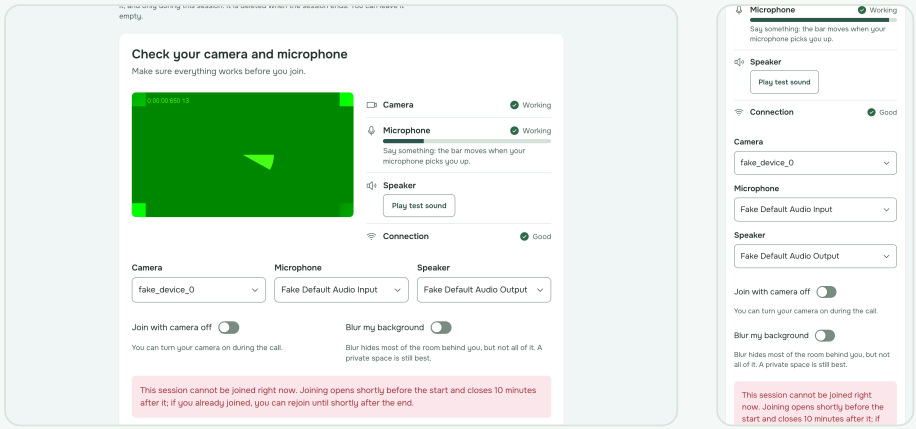

More than 10 minutes after the start, a first join is no longer possible: the page says “The join window for this session has closed.” and offers technical support. You also receive an email asking whether a technical problem kept you away.

Screen 28 · computer and phone

5 The join is refused at the last moment

The server checks the window again when you select **Join now**. If it closed in the meantime, the device check shows “This session cannot be joined right now. Joining opens shortly before the start and closes 10 minutes after it; if you already joined, you can rejoin until shortly after the end.”

Screen 29 · computer and phone

TUTORIAL 3

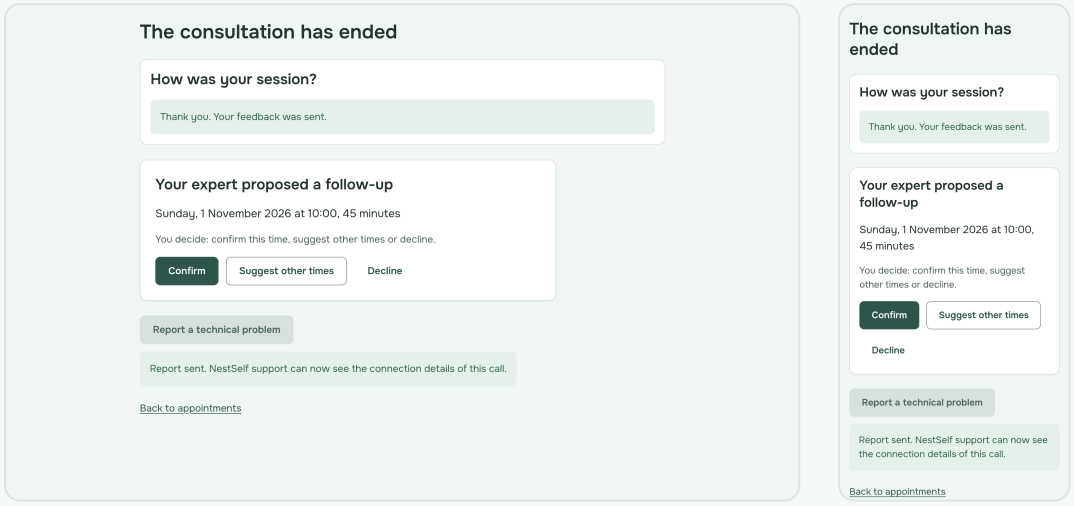

Answer a follow-up proposal

Employee · workspace app

Your expert proposes a date and time; you confirm, suggest other times or decline. Some organisations ask an approver first.

1 A proposal arrives

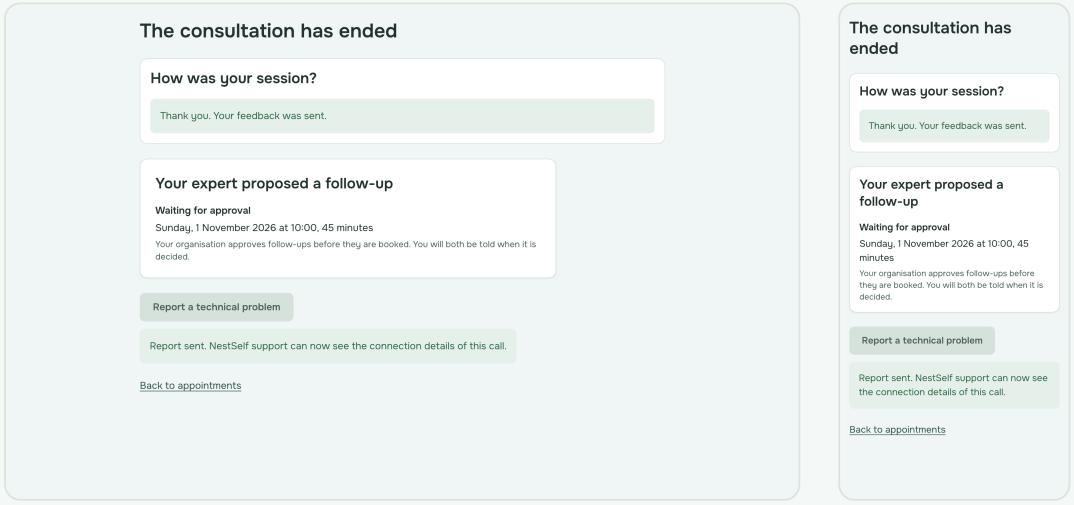

After the call your expert can propose another session. It appears on the post-call screen, on the appointment page and in an email titled “A follow-up was proposed” Choose **Confirm**, **Suggest other times** or **Decline**.

Screen 23 · computer and phone

2 Confirm

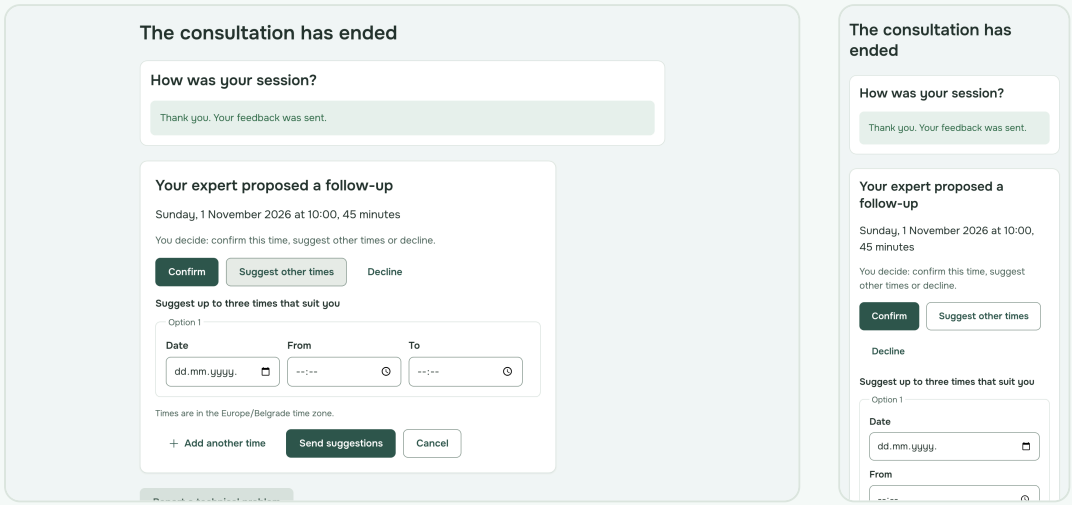

If your organisation books follow-ups without approval, the session is booked at once. If an approver decides first, the card says “Waiting for approval”

Screen 25 · computer and phone

3 Or suggest other times

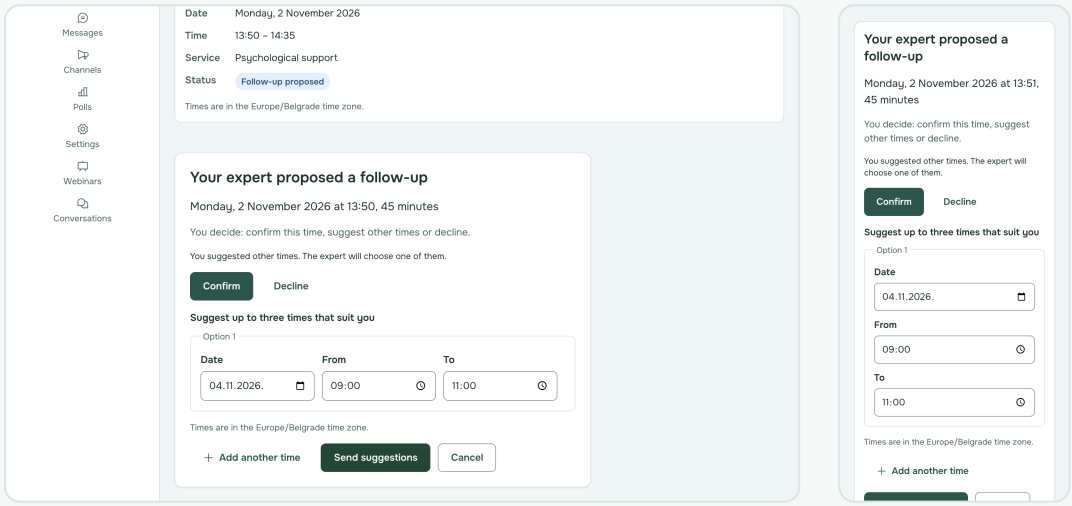

Give up to three windows in the appointment's time zone (**Add another time** adds one), then **Send suggestions**.

Screen 24 · computer and phone

4 Your expert picks one

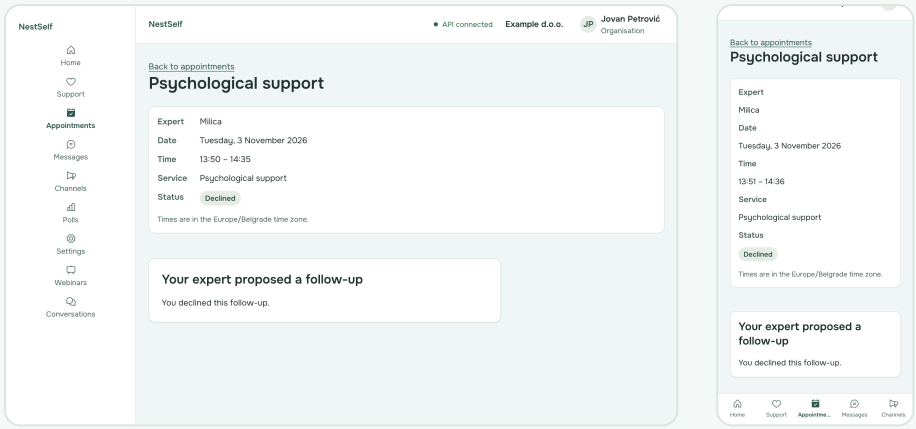

The card says “You suggested other times. The expert will choose one of them.” The status stays **Follow-up proposed** until the expert chooses; then it is booked, or waits for approval.

Screen 26 · computer and phone

5 Or decline

Decline ends the proposal: “You declined this follow-up.” Your expert is told and can propose another time.

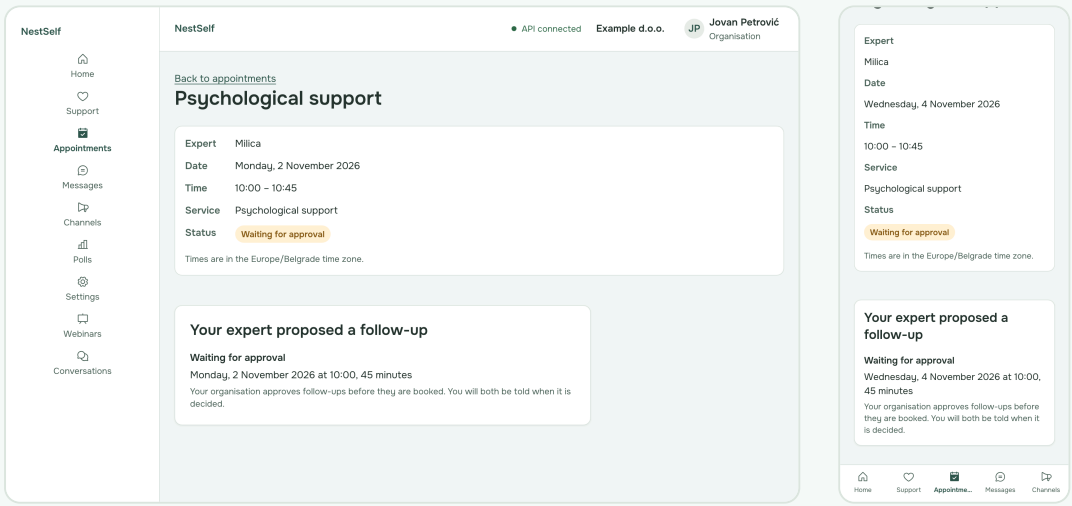

Screen 27 · computer and phone

If your organisation approves follow-ups first

6 Waiting for the decision

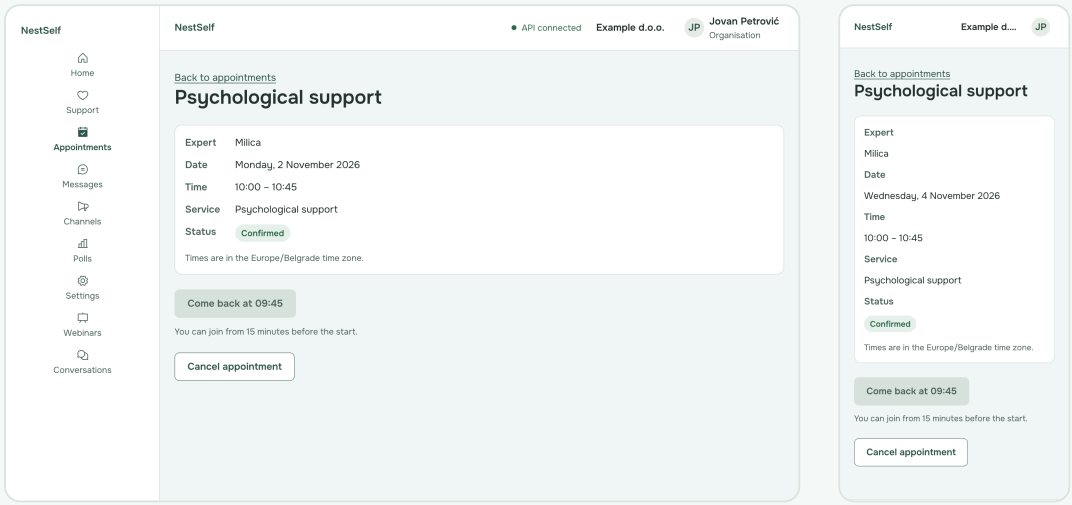

The appointment shows **Waiting for approval**. The approver sees only your name, “Follow-up session with a NestSelf expert”, the date and the length. You and your expert are told when they decide.

Screen 81 · computer and phone

7 Approved

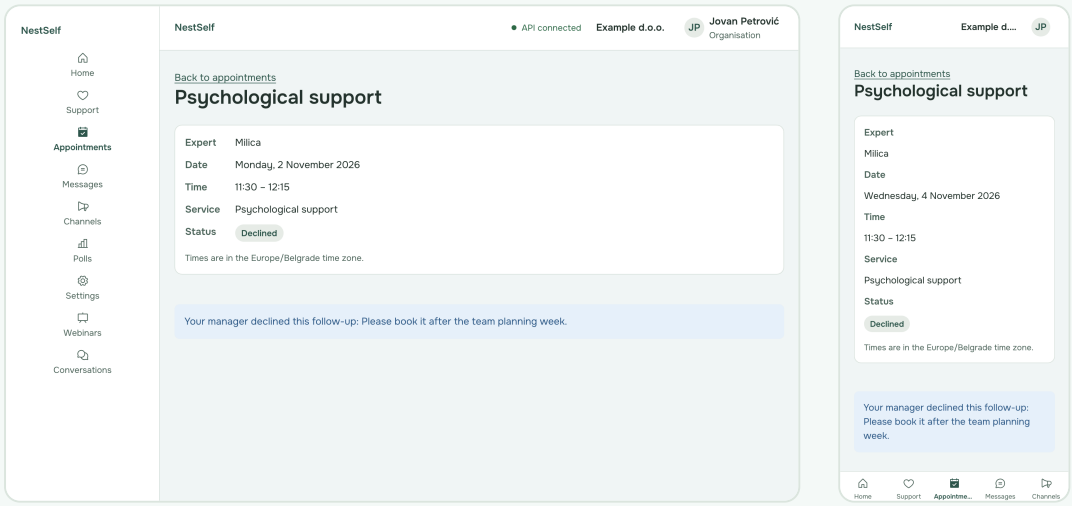

The follow-up becomes an ordinary **Confirmed** appointment. Join it like the first one, from 15 minutes before the start.

Screen 84 · computer and phone

8 Declined

The page shows the approver's short reason. Only you see it. Talk to your expert or HR if you still need the session.

Screen 85 · computer and phone

If nothing happens

- Nobody is assigned to approve for your team: confirming fails with “Your organisation has not assigned anyone to approve follow-ups yet. Contact your HR team.”
- The approver does not decide in time: “The approval lapsed before the proposed time.”
- The proposed time passes first: “The proposed time has passed. Your expert can propose a new one.”

TUTORIAL 4

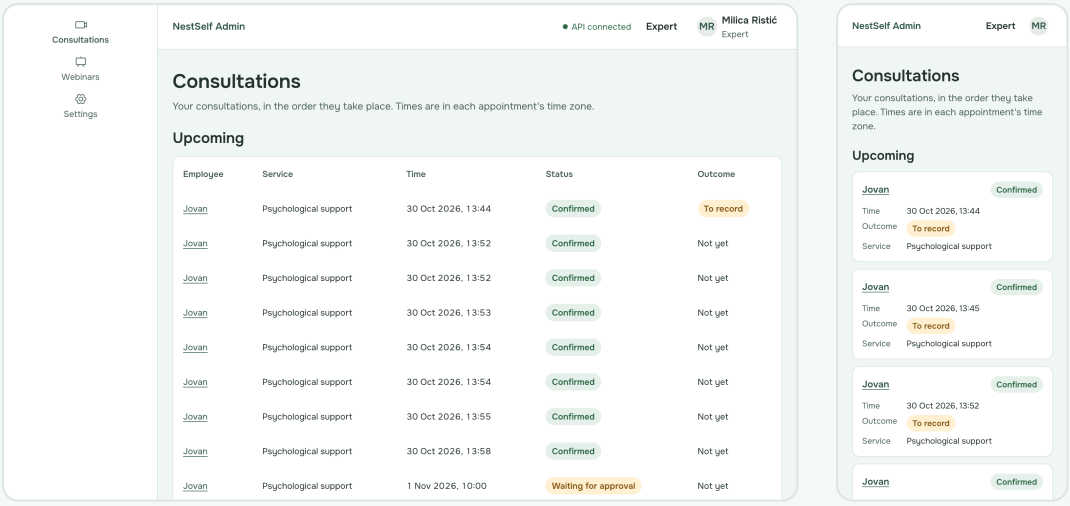

Run a consultation

Expert · admin app

An expert joins, shares a screen if needed, ends the session, records what happened and proposes a follow-up.

1 Open your consultations

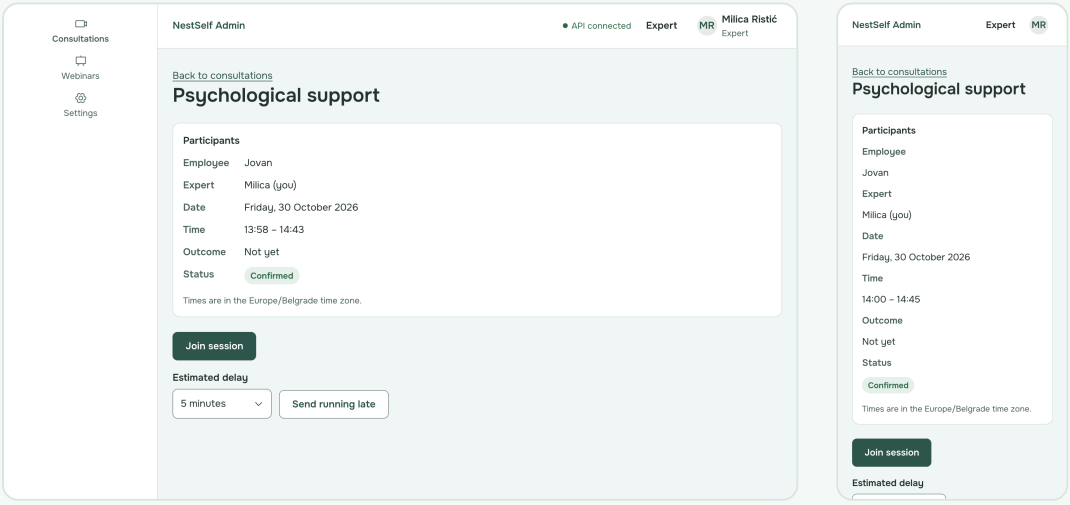

In the admin app, open **Consultations**. You see only the consultations assigned to you: employee first name, service, time in the appointment's zone, status and outcome.

Screen 14 · computer and phone

2 Open the consultation, tell the employee if you are late

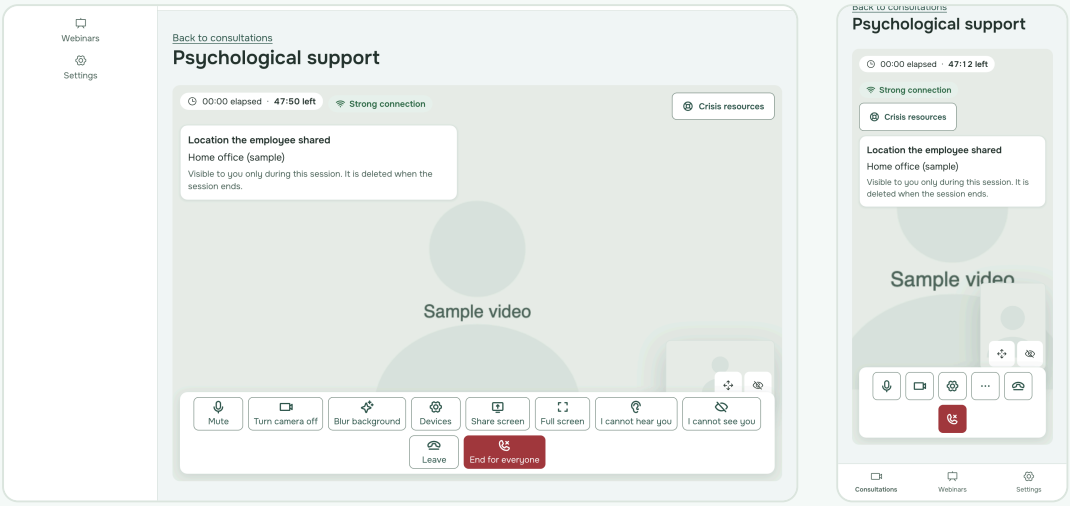

Inside the join window the page offers **Join session**. If you are delayed, set the **Estimated delay** and **Send running late**; the employee sees it in the waiting card. Join runs the same device check as the employee's.

Screen 15 · computer and phone

3 Your call screen

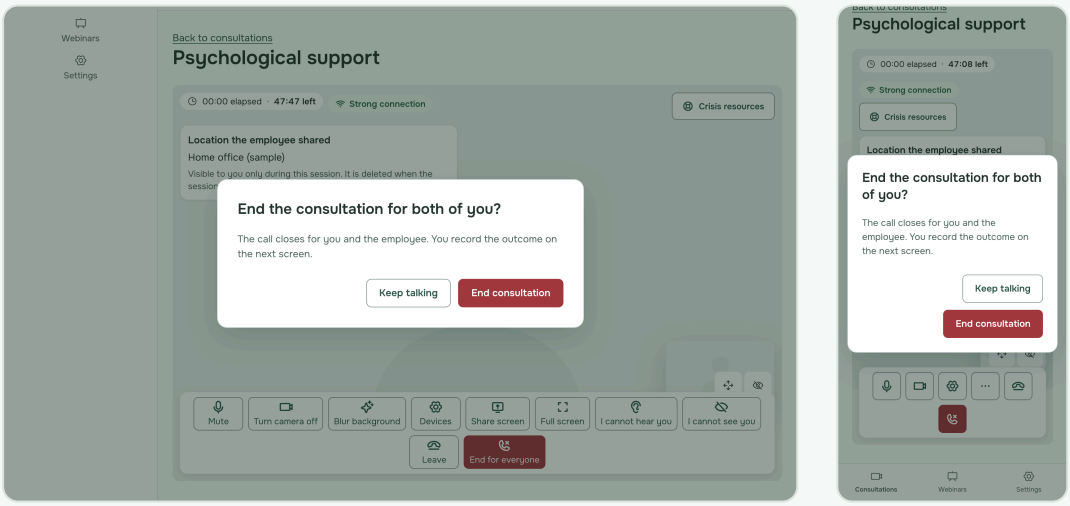

You have the employee's controls plus **Share screen** and **End for everyone**. If the employee shared a location, the card “Location the employee shared” shows it. Your crisis panel adds guidance for experts.

Screen 16 · computer and phone

4 End for everyone

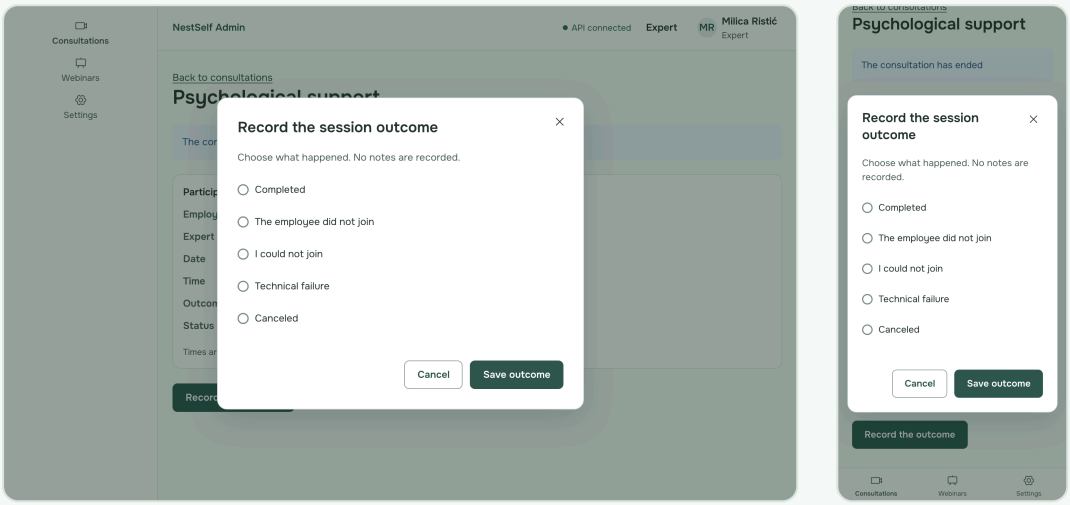

End for everyone asks “End the consultation for both of you?” Confirm with **End consultation**. The call closes for both of you and the outcome form opens.

Screen 17 · computer and phone

5 Record the outcome

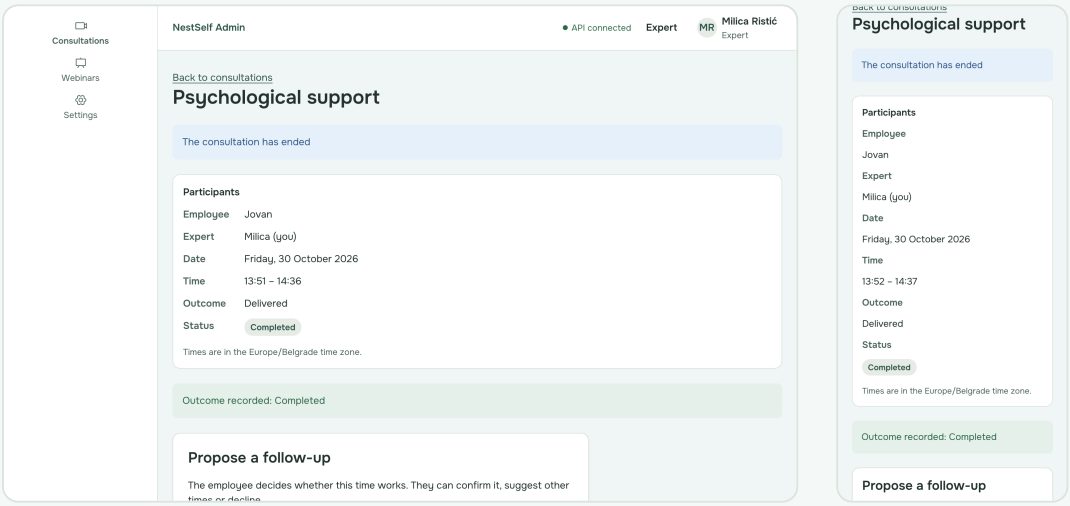

Choose one: **Completed**, **The employee did not join**, **I could not join**, **Technical failure** or **Canceled**, then **Save outcome**. There is no notes field: NestSelf stores no professional notes.

Screen 21 · computer and phone

6 Propose a follow-up

After a completed outcome, pick the **Date**, **Time** and **Duration** and **Send proposal**. No free text. The card then says “Waiting for the employee to answer.”

Screen 22 · computer and phone

> **If the employee suggests other times**
>
> Open the follow-up with **Open the follow-up**, choose one of their windows under **Suggested times** and **Schedule**. From there it is booked or goes to approval, as when the employee confirms.

TUTORIAL 5

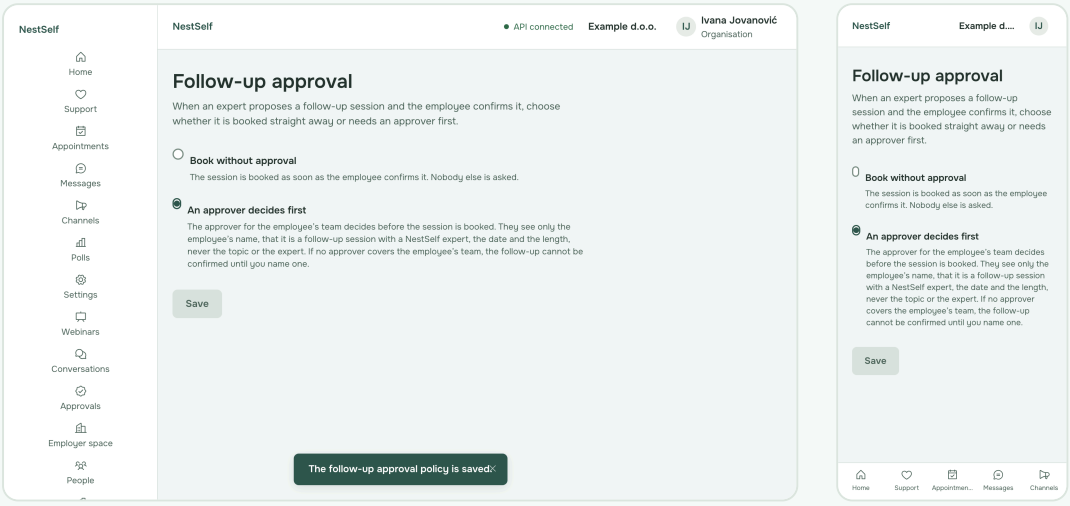

Approve follow-ups

HR and approver · workspace app

An organisation can ask an approver to agree before a follow-up is booked. HR sets the policy; the approver for the employee's team decides each request from four facts.

1 Set the policy once

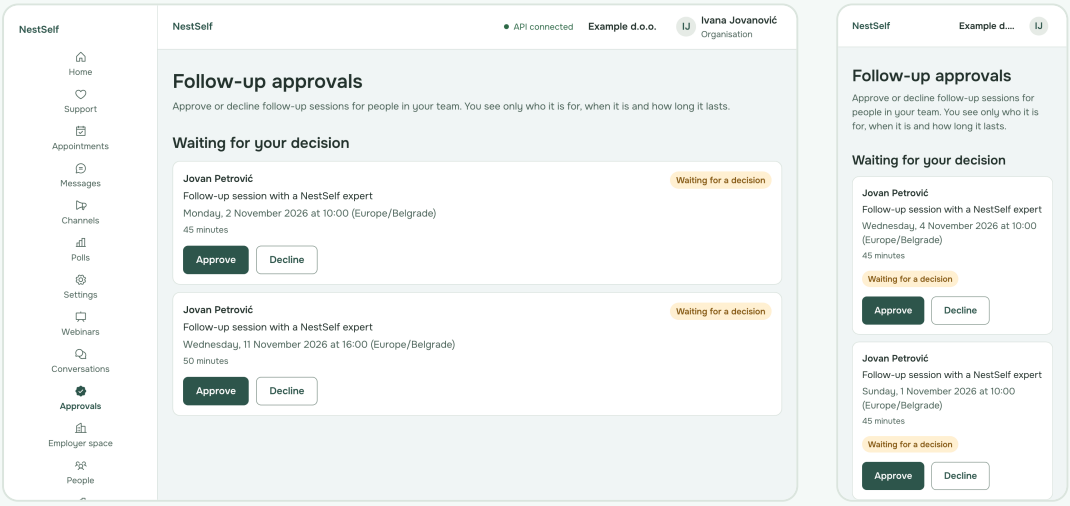

HR opens **Follow-up approval** in the employer space. Choose **Book without approval** (the default) or **An approver decides first**, then **Save**.

Screen 80 · computer and phone

2 Decide a request

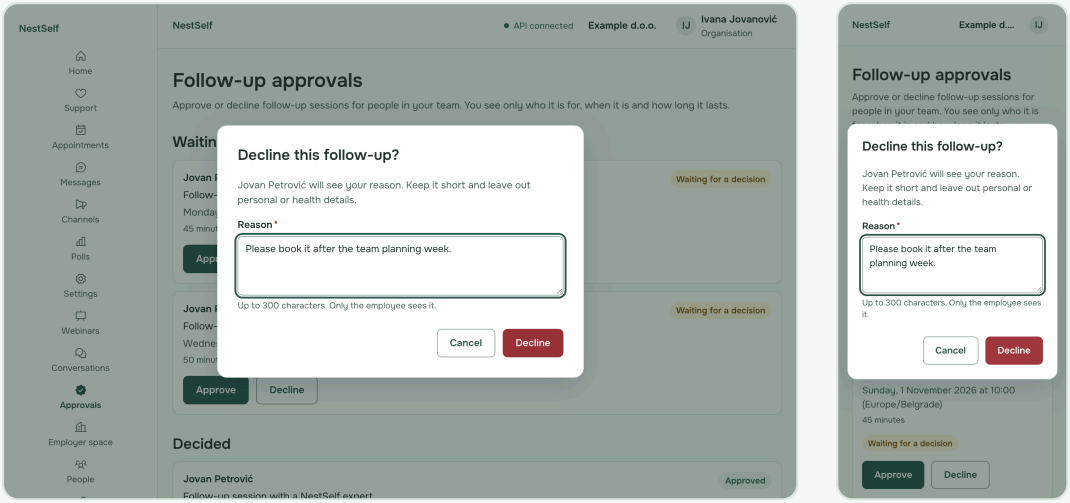

Approvers open **Approvals**. Each request shows the employee's name, “Follow-up session with a NestSelf expert”, the date and time, and the length. Nothing else. Select **Approve** or **Decline**.

Screen 82 · computer and phone

3 Declining needs a reason

A short **Reason** is required. Only the employee sees it.

Screen 83 · computer and phone

Deadlines

- The request email goes to the approver and the alternate approver; both can decide. Nobody decides their own follow-up.
- After 5 working days without a decision, both receive a reminder.
- The request lapses at the earlier of the proposed start and 10 working days. It becomes Expired, and the employee is told.

TUTORIAL 6

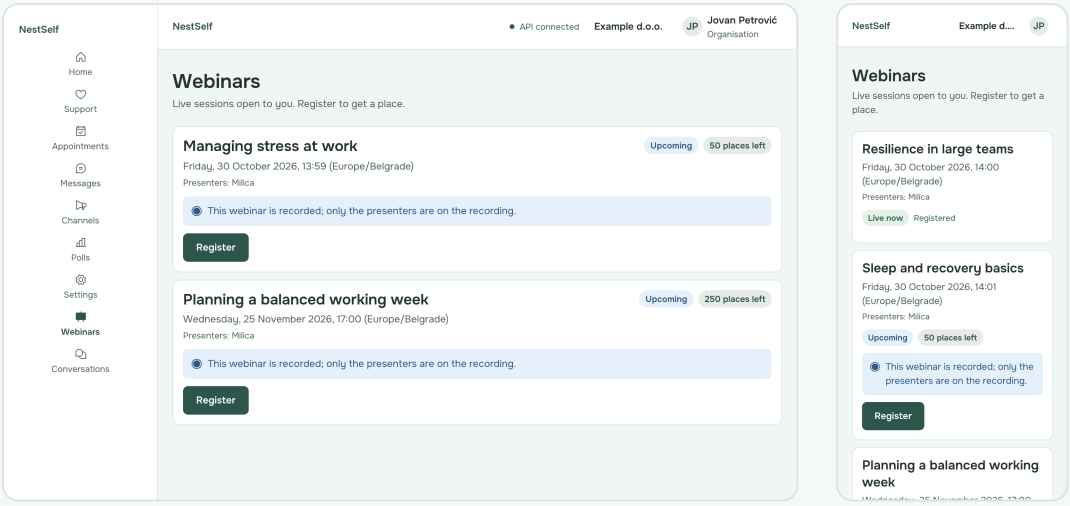

Attend a webinar

Employee · workspace app

A live talk by NestSelf experts. You watch and listen and are never on camera; every webinar is recorded, and only the presenters are on the recording unless you take the floor.

1 Find a webinar

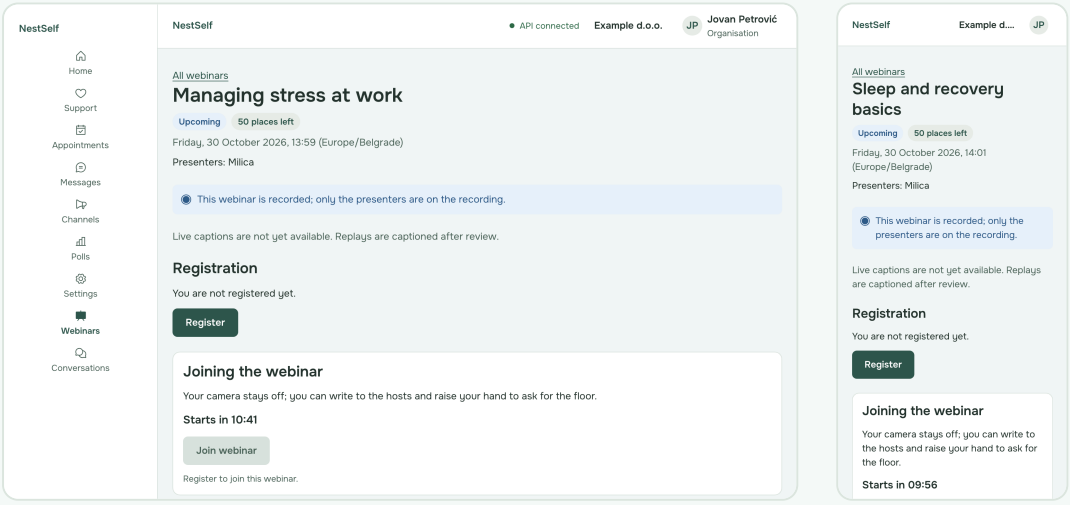

Open **Webinars**. You see the webinars your organisation's audience includes, with the date, the presenters, the places left and the notice “This webinar is recorded; only the presenters are on the recording.”

Screen 60 · computer and phone

2 Register

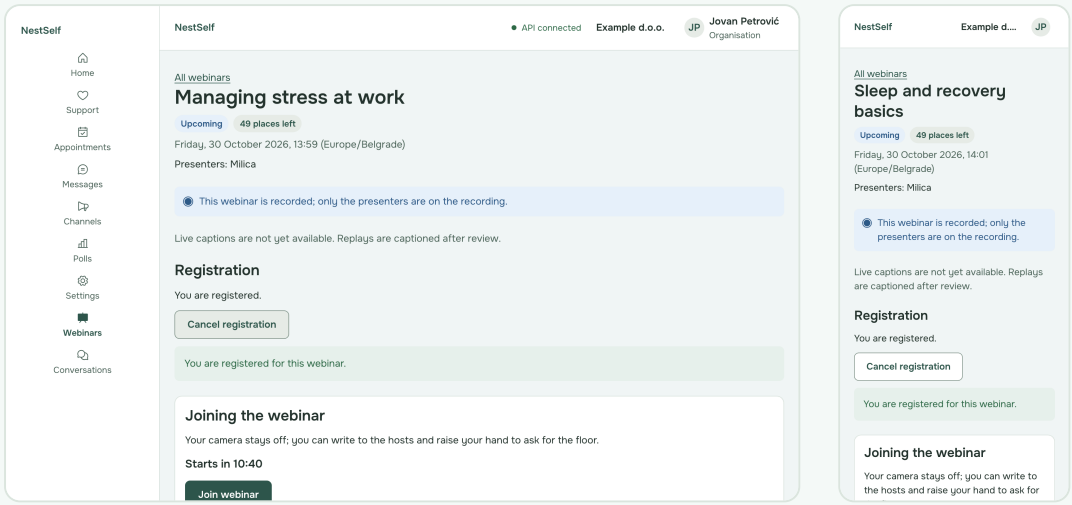

Open the webinar and select **Register**. A confirmation email follows with a private calendar entry; reminders come 24 hours and 1 hour before.

Screen 61 · computer and phone

3 Come back when it starts

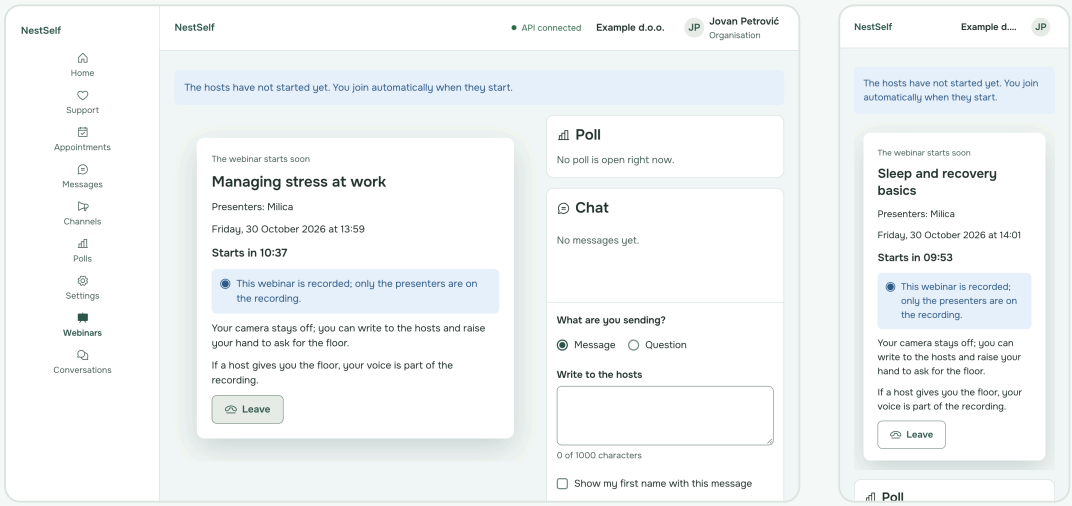

The page shows a countdown and **Join webinar**, which opens 15 minutes before the start. **Cancel registration** gives your place back until then.

Screen 62 · computer and phone

4 The lobby

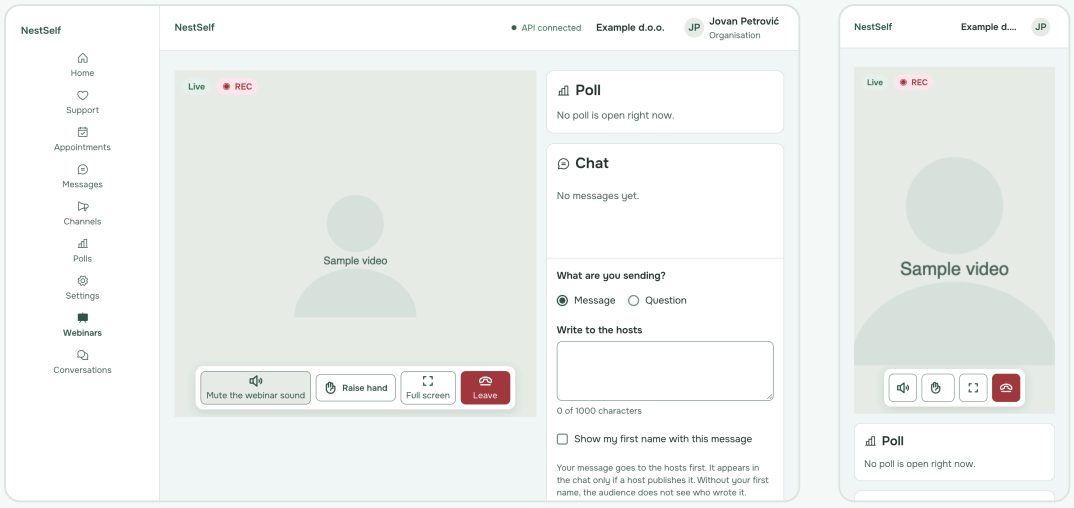

Join webinar first asks you to “Check your sound” (no camera is needed). Then you wait: “The hosts have not started yet. You join automatically when they start.” You join automatically when the hosts start.

Screen 63 · computer and phone

5 Watch and listen

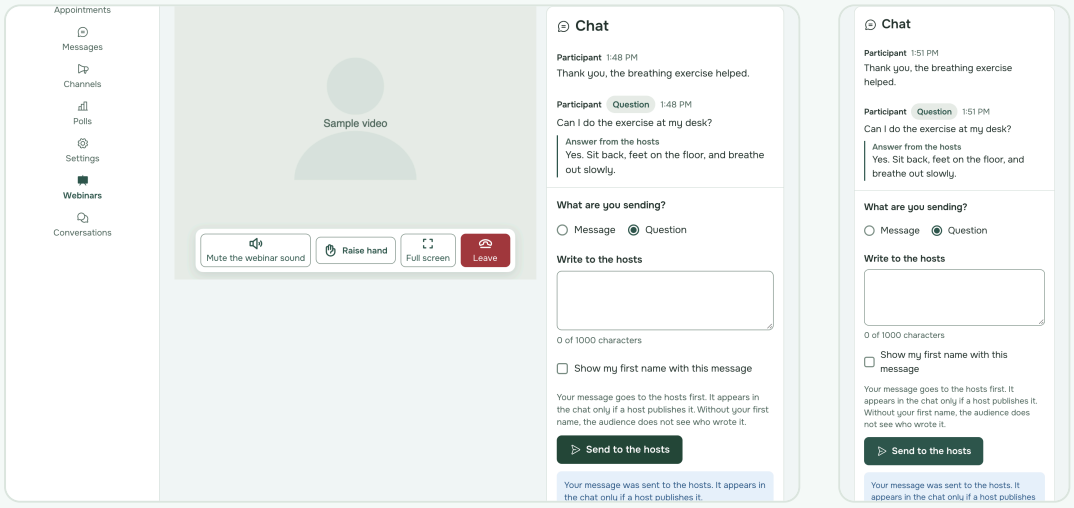

You see the presenters and any shared screen, with **REC**. Your controls: **Mute the webinar sound**, **Raise hand**, **Full screen** and **Leave**. There is no camera button and no list of attendees.

Screen 64 · computer and phone

6 Write to the hosts

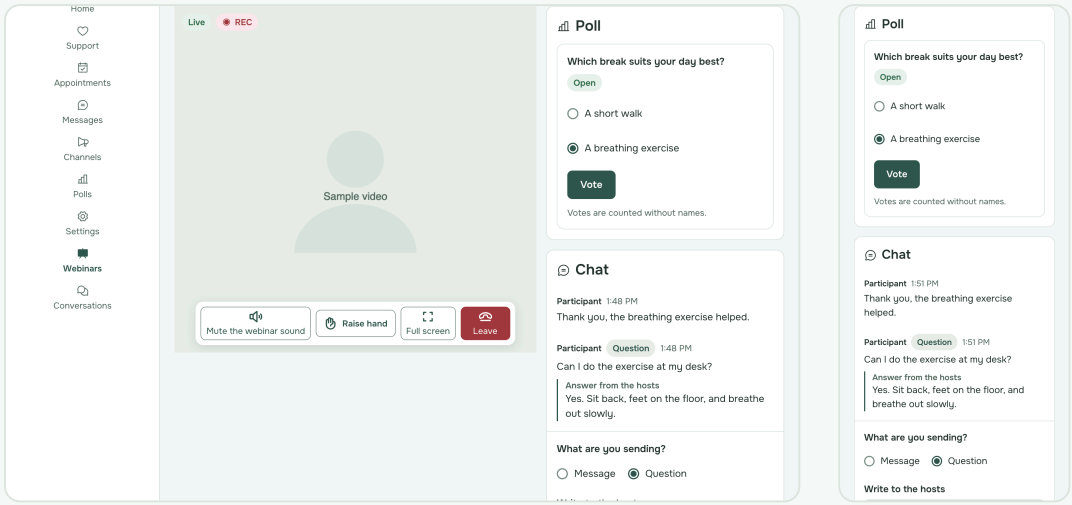

In **Chat**, choose **Message** or **Question**, write, and **Send to the hosts**. A moderator reviews it before anyone else sees it. Tick **Show my first name with this message** to sign it; otherwise it is published as **Participant**.

Screen 66 · computer and phone

7 Vote in a poll

When the moderator opens a poll, pick an option and **Vote**. “Votes are counted without names.” Results appear as percentages when the poll closes.

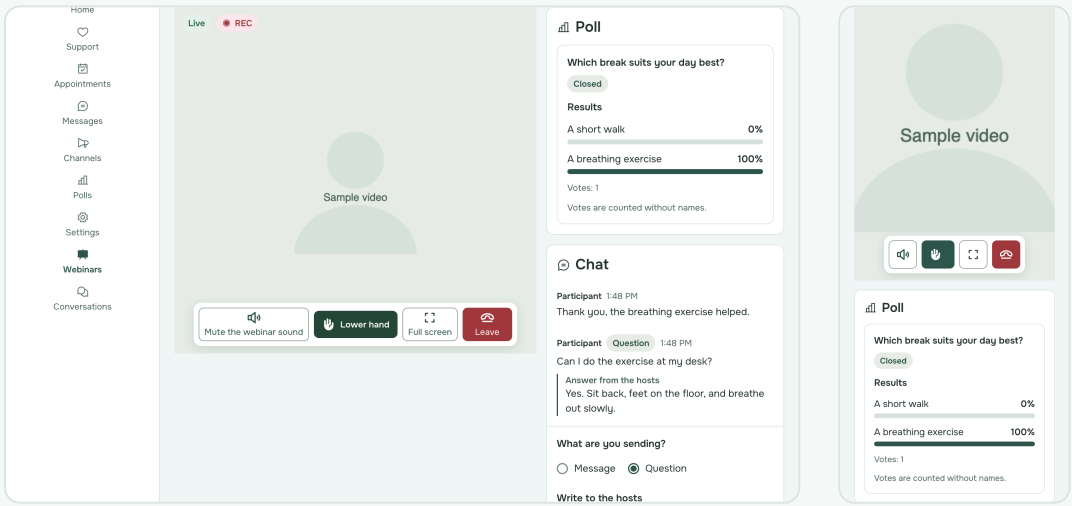

Screen 67 · computer and phone

Speaking

8 Raise your hand

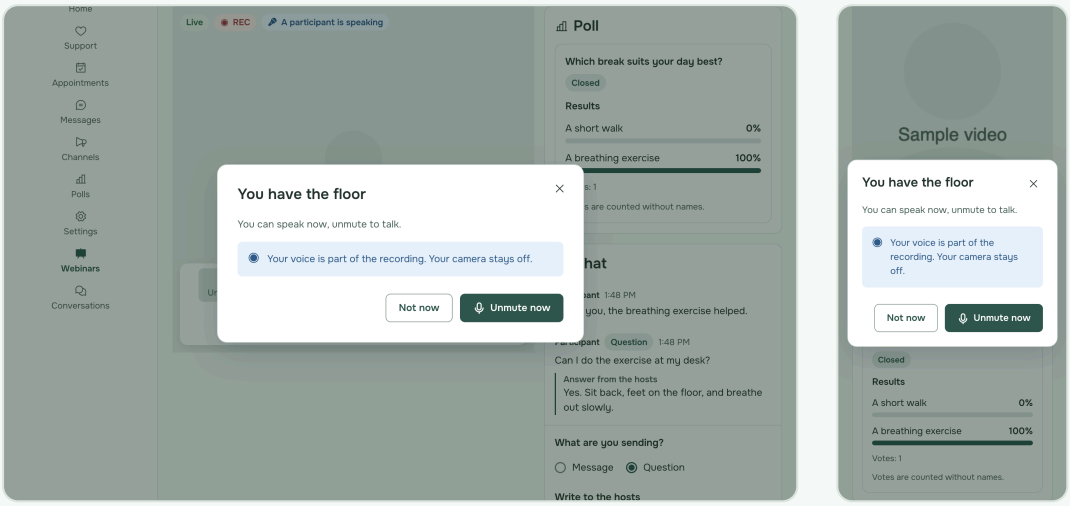

Raise hand tells the hosts you would like to speak; **Lower hand** takes it back. The moderator sees your name; the presenters only see that a hand is up.

Screen 65 · computer and phone

9 You have the floor

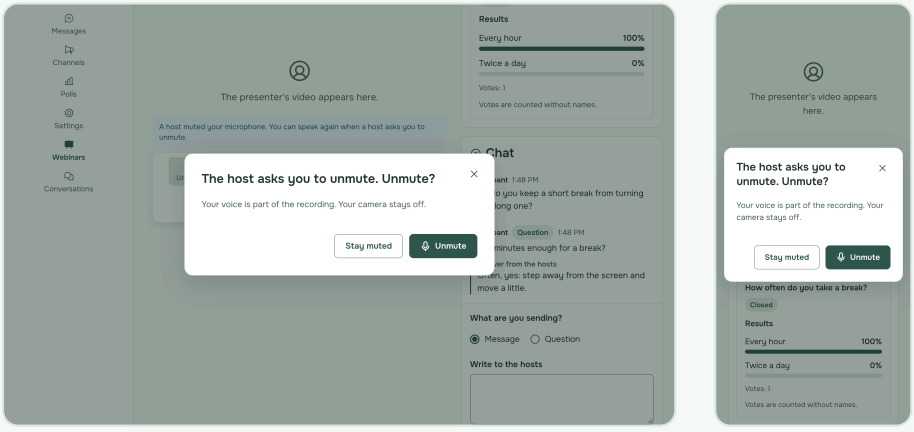

A dialog says “You can speak now, unmute to talk.” and reminds you that your voice is recorded. Your microphone stays off until you choose **Unmute now**; **Not now** keeps it off. Your camera never turns on.

Screen 68 · computer and phone

10 Muted by a host, then asked to unmute

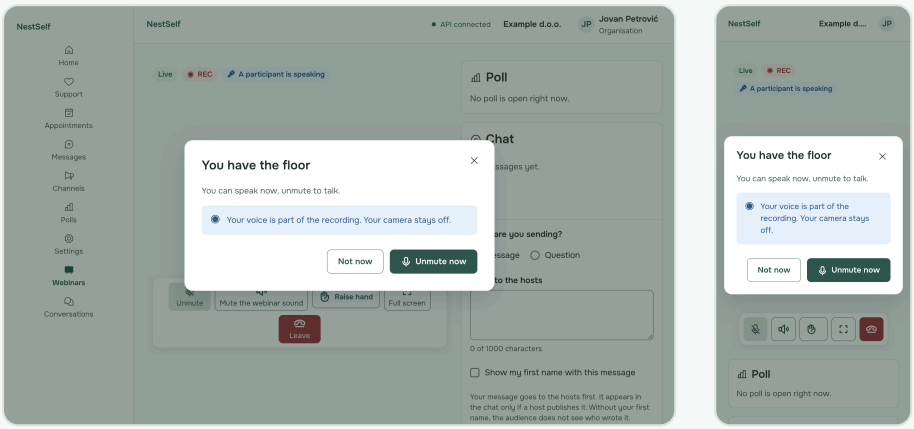

A host can mute you while you speak. If they ask you to speak again, you decide: **Unmute** or **Stay muted**. Nobody can unmute you but you.

Screen 78 · computer and phone

11 In a large webinar

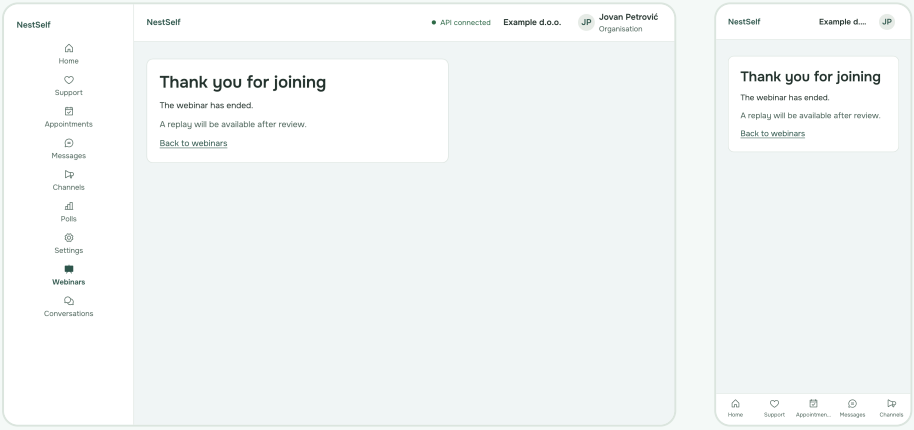

Above 250 attendees the audience is spread over linked rooms. When you are given the floor, your microphone is joined to the presenters' room for your turn, sound only. The dialog and controls are the same.

Screen 88 · computer and phone

12 The end

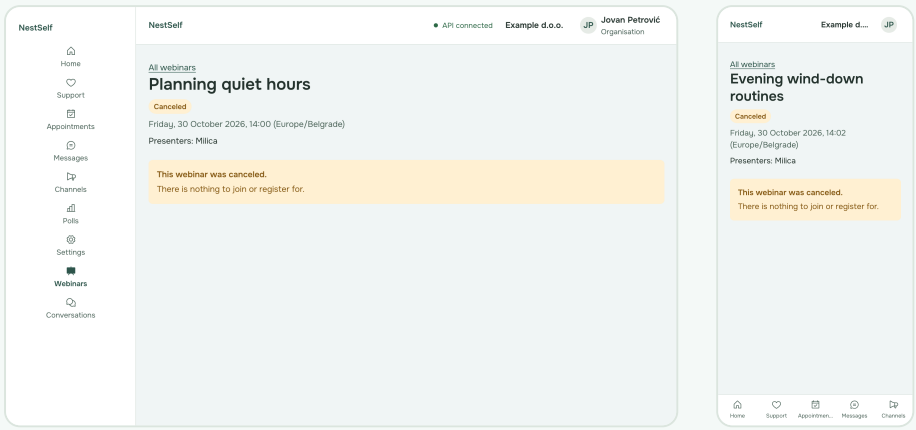

When the hosts end the webinar you see “Thank you for joining” and “A replay will be available after review.” The recording goes to NestSelf's content team for review first.

Screen 69 · computer and phone

13 If a webinar is canceled

You receive an email, and the page says “This webinar was canceled.” There is nothing to join.

Screen 87 · computer and phone

TUTORIAL 7

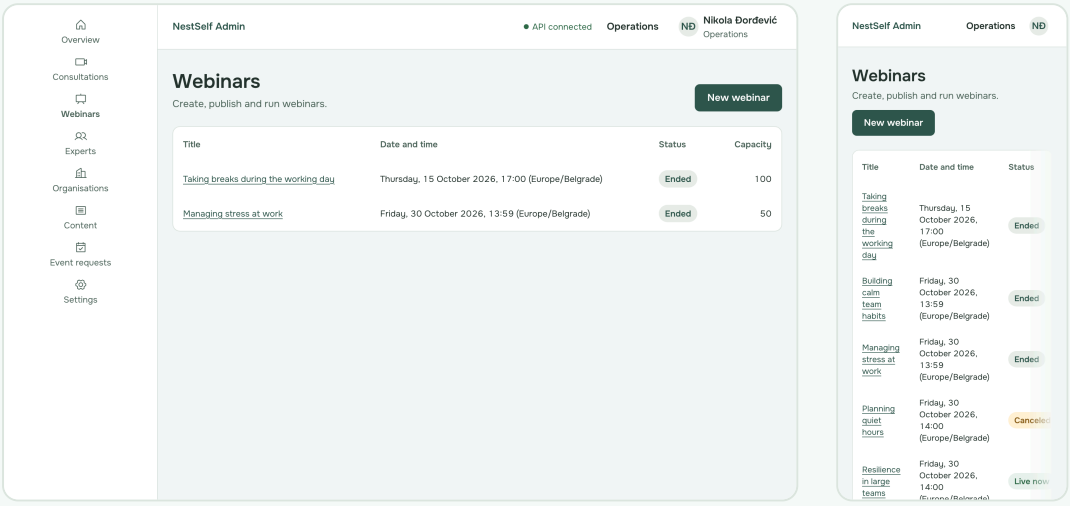

Create and publish a webinar

Operations · admin app

Operations prepare the webinar: title, audience, capacity, presenters, moderator and schedule. Publishing opens registration.

1 Open the webinar list

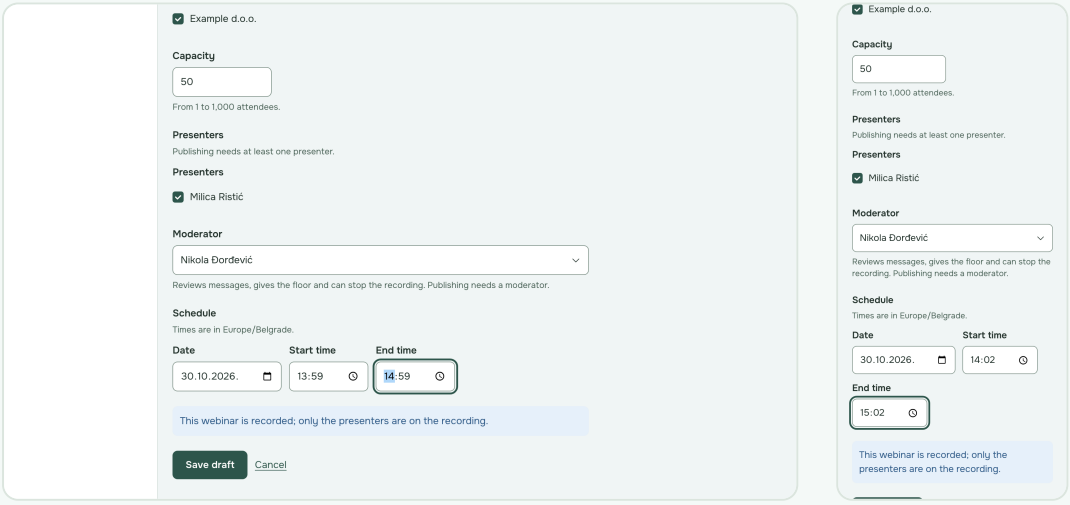

In the admin app, open **Webinars**. Each webinar shows its date, status (**Draft**, **Upcoming**, **Live now**, **Ended**, **Canceled**) and capacity. Select **New webinar**.

Screen 70 · computer and phone

2 Fill in the form

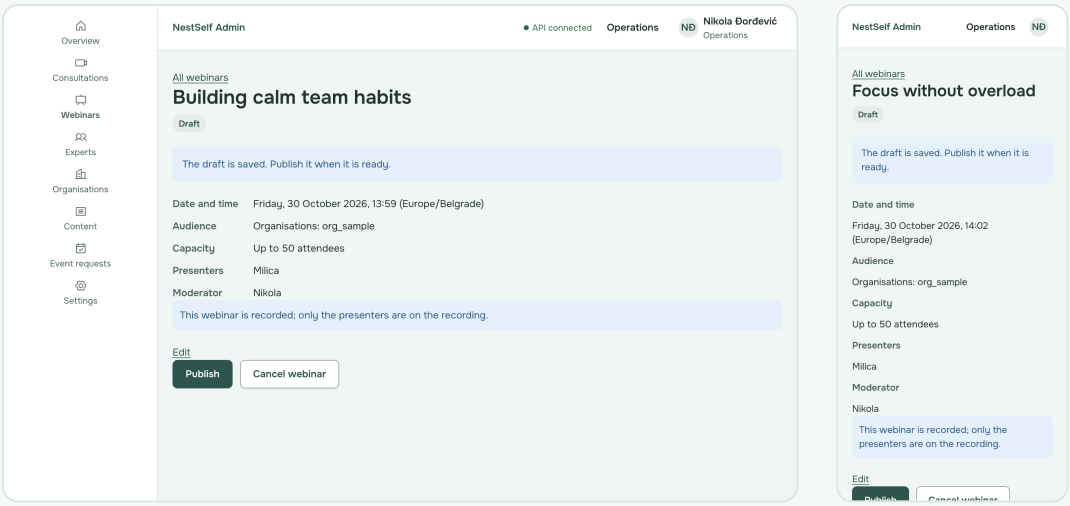

Title in at least one language, audience (**Every eligible organisation**, **Selected organisations** or **Units of one organisation**), capacity up to 1,000, the presenters, the moderator and the schedule. There is no recording switch: every webinar is recorded. **Save draft**.

Screen 71 · computer and phone

3 Publish

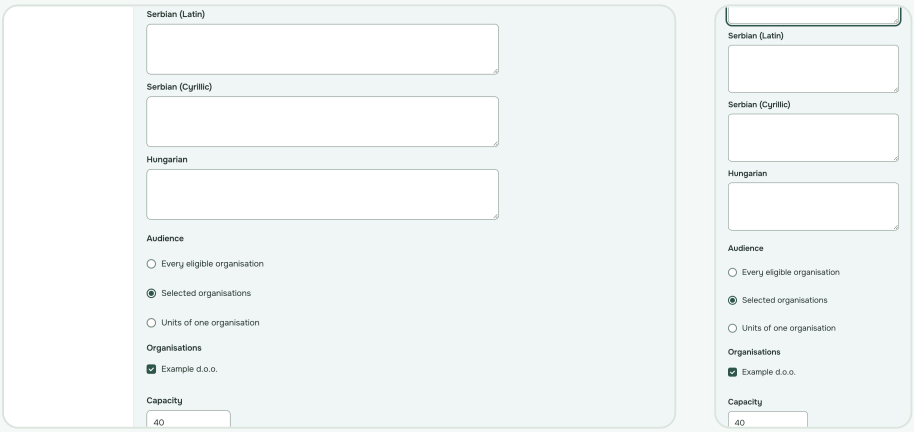

The draft page lists the facts. **Publish** makes the webinar visible to the eligible employees, who can then register. Publishing needs: “Before publishing, add at least one presenter and a moderator, set a start in the future and choose an audience.”

Screen 72 · computer and phone

4 Edit a draft or an upcoming webinar

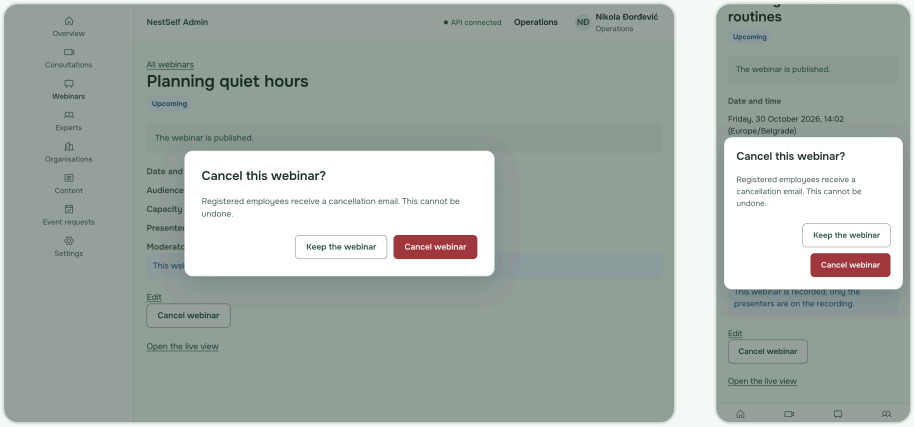

Edit opens the same form. “The audience can be changed only while the webinar is a draft.” **Save changes**. A live, ended or canceled webinar cannot be changed.

Screen 76 · computer and phone

5 Cancel

Cancel webinar asks “Cancel this webinar?” Registered employees are emailed, reminders stop, and it cannot be undone.

Screen 86 · computer and phone

Capacity

Up to 250 attendees share one room. For a larger audience, up to 1,000, the platform adds linked rooms that receive only the presenters; attendees see no difference, and chat, polls and attendance work across them.

TUTORIAL 8

Run a webinar live

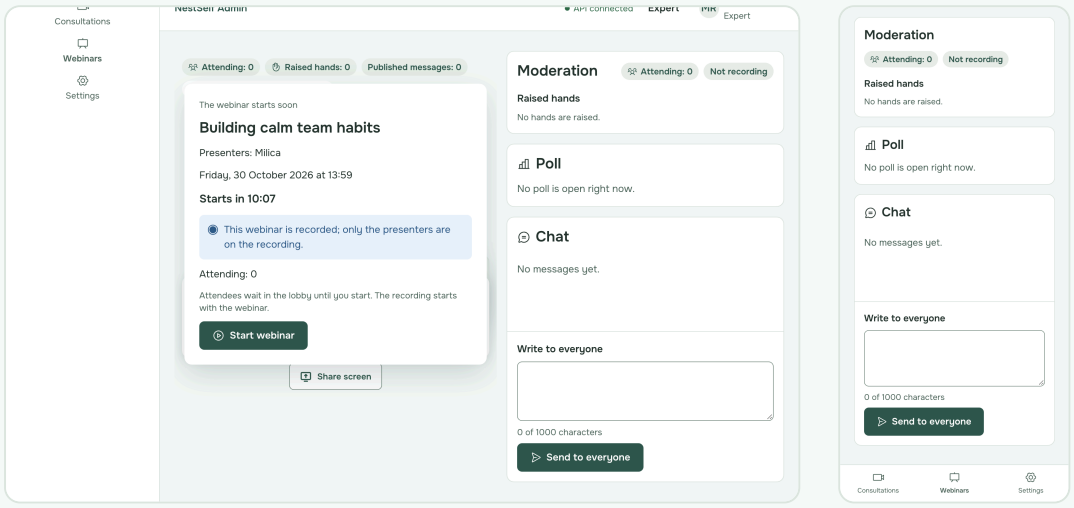

Presenter and moderator · admin app

Presenters speak and share their screen. The moderator reviews messages, gives the floor, runs polls and can stop the recording.

1 Presenters open the live view

Presenter

From the webinar page, **Open the live view** up to 30 minutes before the start. After the device check (with an optional **Test screen sharing**), the lobby shows the registered count and **Start webinar**. Starting also starts the recording.

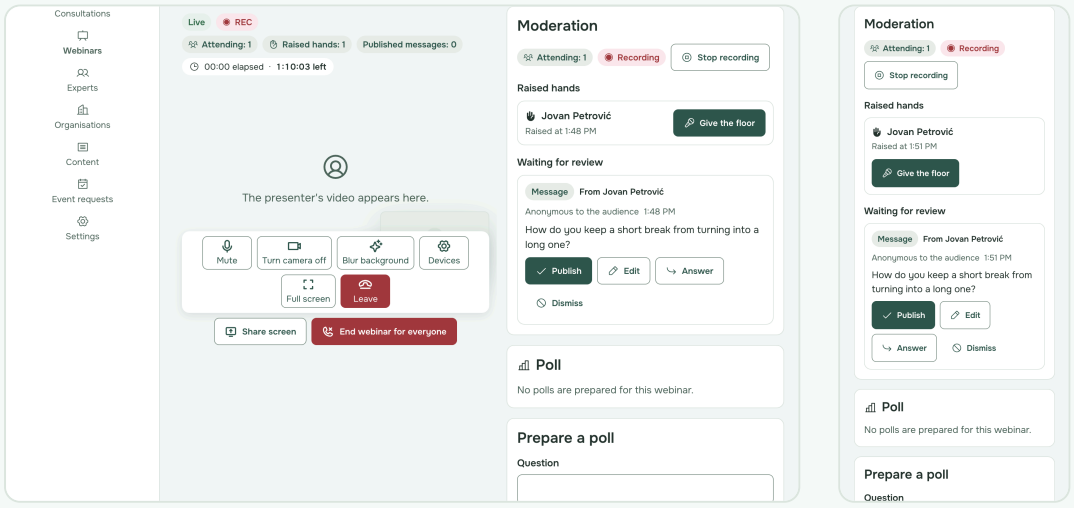

Screen 73 · computer and phone

2 The moderator console

Moderator

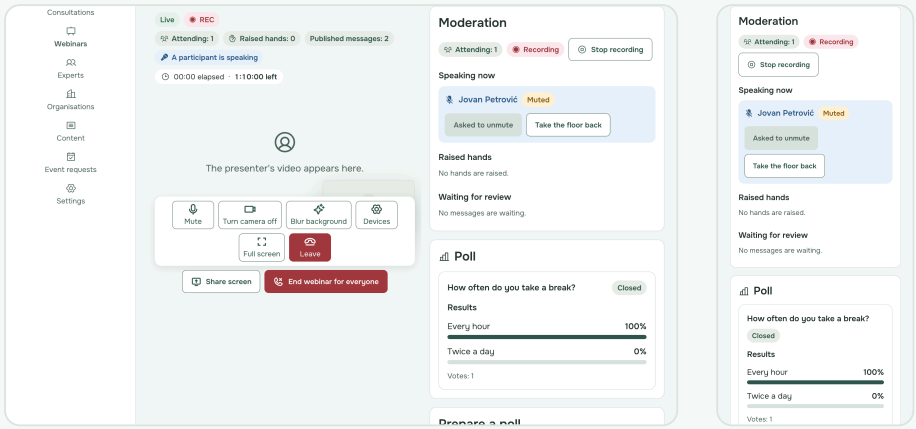

The **Moderation** panel shows attendance, **REC** and **Stop recording**. Each raised hand has **Give the floor**. Each message waiting for review can be **Publish**ed, edited, answered with **Answer**, or **Dismiss**ed.

Screen 74 · computer and phone

3 While an attendee speaks Moderator

The speaker appears under **Speaking now** with **Mute**, **Ask to unmute** and **Take the floor back**. Only the attendee can unmute themselves.

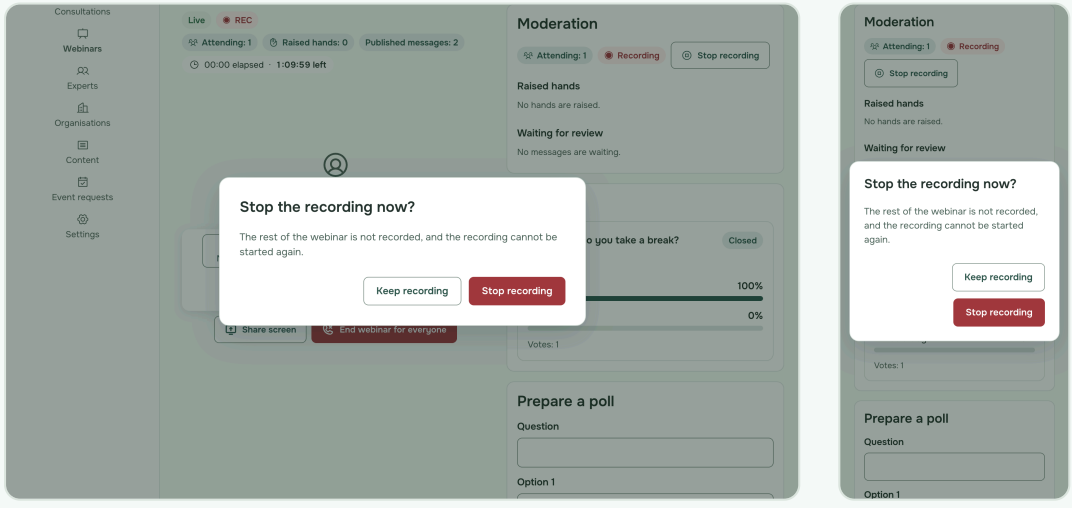

Screen 77 · computer and phone

Polls and ending

Under **Prepare a poll**, write a question and two to six options, **Add poll**, then **Open poll**; **Close poll** publishes the results without names. **End webinar for everyone** ends the webinar and the recording; otherwise the room closes 15 minutes after the scheduled end.

4 Stop the recording early Moderator

Only the moderator can. **Stop recording** asks “Stop the recording now?” The rest is not recorded and recording cannot be restarted.

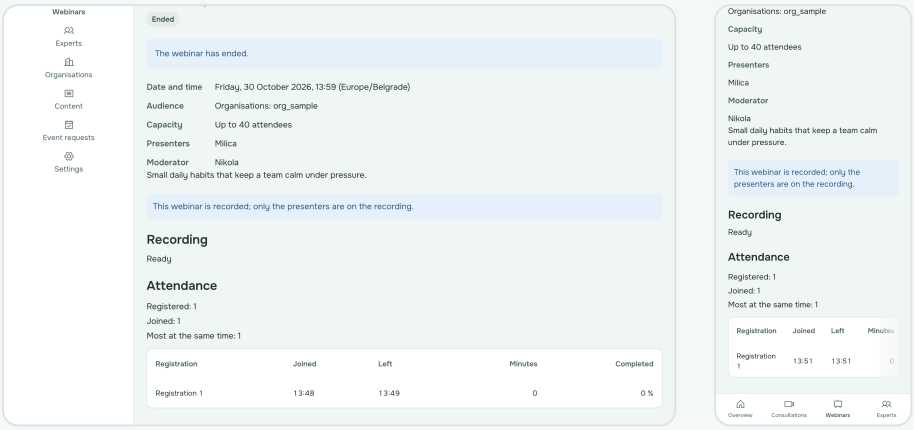

Screen 75 · computer and phone

5 Afterwards: attendance

Operations

The webinar page shows **Attendance**: registered, joined and peak counts, then one row per registration without names, and the recording state (**Being processed**, **Ready**, **Handed to the content team** or **Failed**).

Screen 79 · computer and phone

TUTORIAL 9

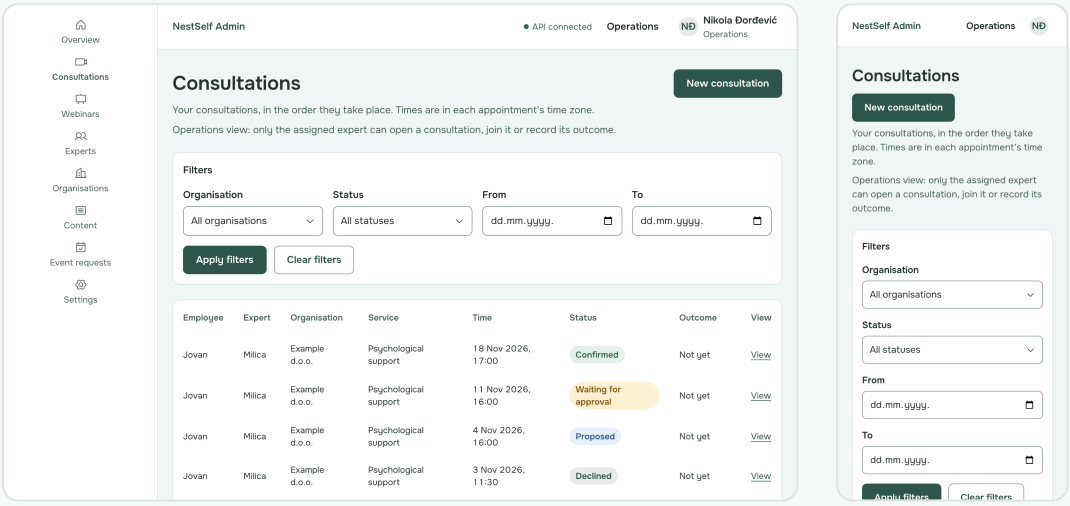

Book a consultation

Operations · admin app

NestSelf operations book and cancel consultations for the client companies they coordinate.

1 The operations list

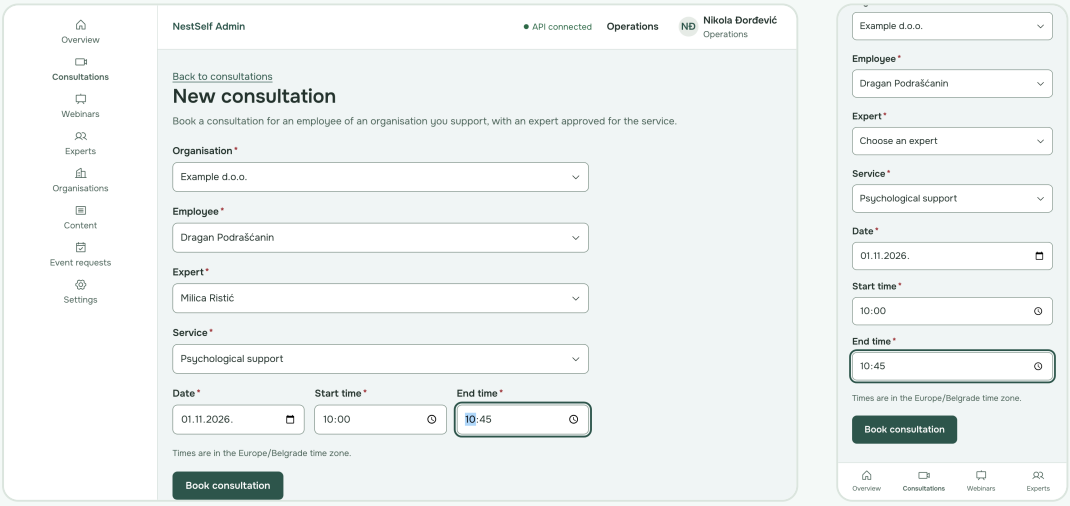

Client operations open **Consultations**: every consultation of the organisations you coordinate, with **Expert** and **Organisation** columns and **Filters** by organisation, status and dates.

Screen 90 · computer and phone

2 Book a consultation

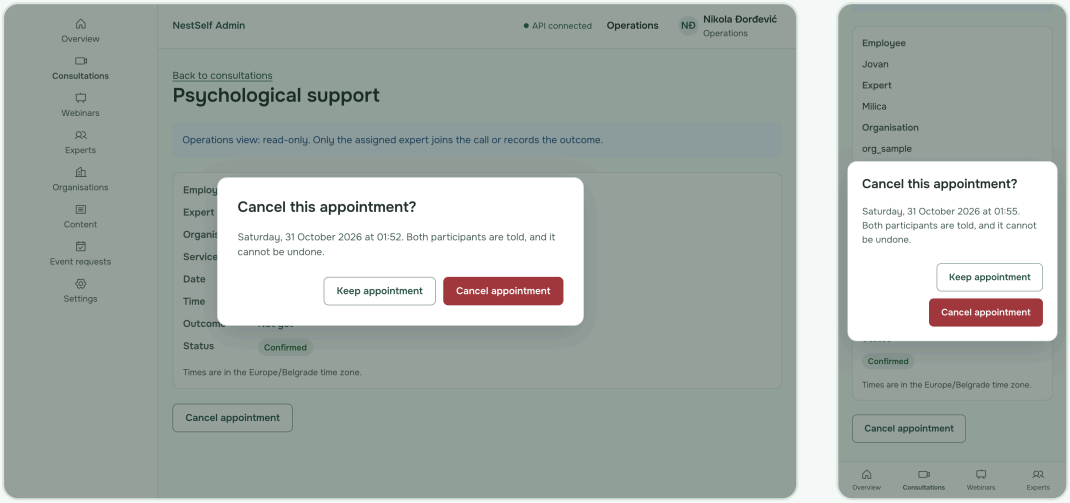

Select **New consultation**. Choose the **Organisation**, the **Employee**, the **Expert** and the **Service**, then the **Date**, **Start time** and **End time** in Europe/Belgrade. **Book consultation**. Reminders are scheduled at once.

Screen 91 · computer and phone

3 Cancel a consultation

On the consultation page, **Cancel appointment** asks “Cancel this appointment?” Both participants receive an email, and a call that is already running closes.

Screen 92 · computer and phone

REFERENCE

Good to know

For everyone.

Recording

- Webinars: always, from start to end, unless the moderator stops it early. Attendees are told at registration, in the email, in the lobby and before they unmute.
- On the recording: the presenters' video, sound and shared screen, and the voice of an attendee who took the floor. No attendee is ever seen.
- Consultations: never. There is no recording control.

Never stored

- Professional notes: the outcome form has no notes field.
- What was said in a consultation: no recording, no chat.
- Who voted for what in a poll; names or device names in technical reports.
- Quick signals such as “I cannot hear you”: gone when the session ends.

What your employer sees

- Nothing about your consultations: not that you booked, joined or missed one, not its topic, outcome, feedback or length.
- Nothing about which webinars you attended or what you wrote in them.
- If your organisation approves follow-ups: your name, “Follow-up session with a NestSelf expert”, the date and the length. That is all.

How long data is kept

- Appointments, sessions, outcomes and approval requests: 7 years.
- Connection diagnostics and technical reports: 90 days.
- Webinar messages and polls: 12 months. Feedback and registrations: 24 months.
- Raw recording pieces: 30 days. A shared location: deleted when the session ends.

Defaults until the data protection assessment confirms them. Calls run in the Frankfurt region; the video service receives random ids, never names.
